CONGRESS MUST PROVIDE MEANS

Mellon Anticipates Enactment of Bonus Legislation.

REVIEWS FINANCIAL SITUATION

Secretary of Treasury Declares That Wall Street Is Overdoing Pessimism and That There Are Good Conditions Everywhere in the Country. Anxiety About Railroad Legislation Unwarranted, He Says.

Washington, Oct. 9.—Secretary of the Treasury Mellon indicated the bonus bill certain to be introduced in the next congress must also provide the means for raising the required money to secure his approval.

This was brought out in a review of the financial situation in which these points were stressed: First, that Wall street is overdoing pessimism; second, that there are good conditions everywhere in the United States; third, there is undue apprehension about the situation in Europe, and fourth, there is unwarranted anxiety about railroad legislation and the strength so-called radicals will sway in congress.

This element of uncertainty, it was learned, already has been studied by the cabinet, and the administration policies are being shaped to meet the situation.

Secretary Mellon believes, it was stated, that the soldier bonus measure should be accompanied by some acceptable plan of taxation to raise the required revenue. This, it was explained, must be a method that will not interfere with the present hope of reducing taxes that are considered confiscatory of the higher incomes. The savings now being effected, amounting to hundreds of millions, it was added, had been intended to apply to reduction of taxation.

It is this general atmosphere of uncertainty that is responsible for what the secretary considered unwarranted pessimism in Wall street and business circles in general. It was stated that he believes conditions throughout the United States to be sound in every particular and in no way to reflect the situation as reviewed in financial circles. It was added that reports to him show no unemployment or depression in any of the great industrial activities. He believes, however, that big business is unduly alarmed over other causes. He feels that while the situation in Europe is admittedly bad, particularly in Germany, that this element is not of sufficient force to affect the unusually sound conditions in this country.

The bonus, too, is a factor in this, it was pointed out, but as soon as a definite policy is outlined and business knows what to expect, this will be offset.

In the opinion of the secretary the real cause for anxiety is the number of what he terms "radicals" who are coming into congress and what they will do to the railroads and business in general. The proposal to compel consolidation of the railroads and bring about sweeping reduction in freight rates are causing the most anxiety in his opinion.

WOULD TRADE WITH SOVIET

Congressional Commission Returning to America From Russia.

London, Oct. 9.—Ambassador Harvey was present at Waterloo station to bid bon voyage to the unofficial congressional commission returning to America from Russia. Senators King and Ladd expressed themselves in enthusiastic terms regarding the results of their 90,000 mile tour of Russia. Every day during the voyage home they and their associates will confer for two hours completing their report. Although none of the party would consent to be quoted until after the publication of their report it can be stated authoritatively that they are unanimously in favor of immediate resumption of trade relations with Russia. Senator King, who was intensely prejudiced against Trotsky, now recognizes the Russian leader as "an unusually able man."

Aviator Killed.

St. Paul, Oct. 9.—Harry J. Quinn, St. Paul aviator, was killed near here when the wings of a new monoplane he was testing dropped off at an altitude of about 500 feet.

Refused Citizenship Papers.

Newark, O., Oct. 9.—More than half a dozen foreigners were refused citizenship papers by Judge C. N. Moore because they had been convicted of liquor law violations.

C. P. VANCE

Member of Commission to Survey Philippine Rubber Situation.

WOULD END WAR

Lloyd George Urges Unity of Action Among All Nations.

Montreal, Oct. 8.—David Lloyd George's message to Canada, delivered before an audience of 7,000 here, was a plea for unity of action among all races of the world to end war. Describing the horrors of the late conflict, and pointing to his own whitened locks as an example of what war does to men who have a part in it, the former British premier declared it is the destiny of nations to prevent war in the future. "No man can tell now what that war will mean to the human race," he said. "The future is in the fog rising from the war, and I can not tell, no man can tell, what is going to happen. But this I do know that the war altered the destiny of mankind for generations, aye for centuries to come."

WOULD SUPPORT LEAGUE OF NATIONS

Viscount Grey Sees Indications of a Future War.

London, Oct. 9.—Viscount Grey declares that the Italo-Greek episode has thrown a searching light on the state of Europe and says that Europe is drifting towards a future war unless the league of nations is supported.

"The only thing which can prevent the catastrophe of another great European war is that there should be in every case a genuine attempt to settle disputes between nations by the just decision of an impartial authority before resort is had to force," says Lord Grey.

"Europe has drifted helplessly but perceptibly towards future war. The one thing which might have averted this was the close agreement and confident co-operation between France and Britain. The sinister course of recent events was due to this want of co-operation.

"Recent events have shown with horrid clearness that Europe is sliding slowly towards an abyss. Do we realize how far down the slope we have already gone? It is essential that representatives of Britain should be clear whether they are united upon a policy of upholding the covenant of the league. Another crisis such as the Italian-Greek controversy may bring us all to the final parting of the ways. Future liberties of Europe depend upon regulating disputes between nations by justice and law, maintaining the sanctity of treaties."

War Hero at White House.

Washington, Oct. 9.—General Josef Haller, Polish war hero, who is to be the guest of the American Legion at its San Francisco convention, was presented to President Coolidge called on General Pershing and then, with members of his staff, went to Arlington to lay a wreath in the name of Poland on the tomb of the unknown soldier. The general left today for San Francisco.

Haul Made by Bank Bandits.

Oakland, Cal., Oct. 9.—Bandits held up employes of the West Oakland branch of the Oakland Savings and Loan Association and escaped with \$11,000.

Diamond Salesman Robbed.

Chicago, Oct. 9.—J. Schoren of New York, a diamond salesman, reported to the police here that he had been slugged and robbed of a satchel containing diamonds valued at \$50,000.

MAY SUPPRESS RUM RUNNING

Britain Expected to Co-operate With United States.

ACTION LIKELY AT EARLY DATE

Some Move to Deal Effectively With the Situation Created by Liquor Laden Vessels of British Registry Hovering Off the American Coast May Be Made Soon by the London Government.

Washington, Oct. 9.—State department officials wait hopefully for news from London indicating that Great Britain would co-operate with the United States in suppressing rum running under the British flag off American shores.

The belief prevails here that, following the imperial conference in London, the British government will take some action to deal effectively with the situation created by liquor laden vessels of British registry hovering off the coast of the United States. Secretary of State Hughes and Henry G. Chilton, British charge d'affaires in the absence of Ambassador Geddes, have held frequent conferences on the subject at the state department.

Prior to the meeting of the imperial conference, the department sent to Ambassador Harvey in London a complete file of material dealing with the problem created by the hovering ships off the American coast. Colonel Harvey delivered the file to the British foreign office, which had it ready for submission to the prime ministers attending the imperial conference.

No official word has been received here as to the attitude of the conference toward the American proposal for a 12-mile search and seizure privilege in order to stop rum running. News dispatches, however, are regarded as indicating that the conference favors some action to stop the misuse of the British flag in violating American law.

Observers here do not regard as insuperable the objections which were raised by Great Britain to the Hughes plan for dealing with the problem. Special agreements for the 12-mile privilege in order to handle a specific situation, it is pointed out, have been made before, and operate to strengthen rather than to weaken the standing of the traditional three-mile limit guarded so zealously by the British admiralty.

The United States in proposing the 12-mile modification for dealing with rum running does not wish to impugn the accepted three-mile limit of territorial jurisdiction. Once the American viewpoint is thoroughly understood abroad, it is felt, Great Britain will be willing to join with the United States in effective measures to stop the smugglers who use the British flag as a shield.

SPEEDY SHIPS NEEDED

Uncle Sam Has Only One That Can Outrun a Rum Smuggler.

Washington, Oct. 9.—Extension of the area within which rum pirates may be captured will be of little avail unless speedy ships are provided for the purpose, it was said at the treasury. "We have only one ship that can outrun a rum runner," said Secretary of the Treasury Mellon. "Our others are easily outdistanced and outmaneuvered. We must be provided with faster craft." The secretary pointed out that extending the danger zone for smugglers 12 miles would, of course, make it more difficult for them to communicate with the shore, but that it would not necessarily make it easier for the slow moving "dry navy" to overhaul those hovering outside.

Treasury officials will go into conference with the Canadian government on Nov. 5 in an effort to stop rum smuggling across the border, it was announced.

Bill Held Boon to Cuba.

Havana, Oct. 9.—President Zayas will sign the modified Tarafa bill. He takes the attitude that the bill is really a boon to the republic of Cuba; that antagonism against the bill has been brought about by abortive interpretations. The bill provides for unification of practically all Cuban railway systems and calls for the closing of many seaports of entry. The bill has met with opposition of American sugar interests, several protests having been filed with the American state department.

NEIL MERTON JUDD

Resumes Exploration of Ruins in Chaco Canyon, New Mexico.

DOINGS IN OHIO

Klan Question Raised.

St. Clairsville, O., Oct. 9.—For the first time in the history of Belmont county judicial procedure, jurors have been questioned regarding their possible affiliation with the Ku Klux Klan. In the case of Julia Tallarovich of Maynard, O., against the Pursglove-Maher company for \$4,000 damages, alleged due because the company diverted water onto her land, the counsel for the woman asked whether any jurors were Ku Kluxers. All said no.

Newspaper Women to Meet.

Dayton, O., Oct. 9.—The Ohio Newspaper Women's association will hold its annual convention in Cincinnati in November, tentative dates, Nov. 16, 17 and 18, having been set at a meeting of the board of directors. The program as outlined will include a number of prominent editors and women journalists in the state as well as speakers of international importance.

Donahy's Declaration.

Columbus, Oct. 9.—Governor Donahy will not be a candidate for delegate-at-large to the Democratic national convention next year, he said. "I will go to the convention if elected as a delegate," said Donahy, "but I do not intend to seek election. I am kept too busy with state affairs to bother voluntarily with national politics."

Victim Succumbs.

Zanesville, O., Oct. 9.—Dr. Lav G. Burroughs of Colinsville, Ill., died here of injuries received in an auto collision near this city. Harry J. Kinney of Zanesville received a fractured skull in the accident, and Mrs. Burroughs, Mrs. Kinney and G. S. Ford, also of Zanesville, were bruised and cut.

Arms Cache Uncovered.

Springfield, O., Oct. 9.—Acting upon information supplied by Mrs. Jean Foley, held in Darke county jail, Greenville, on a charge of bank robbery, Darke county officials uncovered a cache of rifles, revolvers, ammunition, nitroglycerin and safe blowing equipment buried on the William Thomas farm, east of Springfield.

Carry Away Safe.

Cincinnati, Oct. 9.—A gang of burglars entered the office of the Toad Stool Inn in Avondale and carried away the safe, which weighed half a ton and contained \$2,300 in cash, besides a number of valuable papers, the personal property of A. J. Marshall, proprietor of the inn.

Miner Killed.

New Philadelphia, O., Oct. 9.—Albert J. Shidaker, 28, local miner, was killed, when one of the front wheels of his automobile was broken off, caused by hitting a sand pile in the road. Four other occupants of the car received minor injuries.

Two Auto Victims.

Cleveland, Oct. 9.—Mrs. Mary Nichols, 62, died from injuries received when she was run down by an auto. Emil Berardi, 24, was killed here when a train hit his auto at a crossing.

Probers Submit Report.

Paris, Oct. 9.—General Cornelius Vanderbilt and Martin W. Littleton returned from Belleau cemetery. They made public their report on the condition of the graves of American soldiers and the upkeep of the cemetery. The report declares that no blame rests on the cemetery authorities for the condition of the cemetery owing to the fact of the difficult work of transplanting the graves made necessary by the recent wholesale removals.

WALTON LIKELY TO RESIGN

Will Deliver Message Thursday to Oklahoma Legislature.

TWO INQUIRIES IN PROSPECT

Federal Grand Jury Investigation of Governor's Acts and the Workings of the Ku Klux Klan Hinted at in Judge Williams Charge—General Assembly Also to Probe Walton's Recent Doings.

Oklahoma City, Oct. 9.—Oklahoma is seething with intense bitterness as plans go forward for the extraordinary session of the legislature called by Governor J. C. Walton for Thursday.

Feeling is even more intense than some 10 days ago, when the legislature attempted to meet on its own call in defiance of the governor and his militia. There are persistent rumors that the governor will resign, all scornfully denied by his close friends.

A sweeping federal grand jury investigation of the governor's acts and the workings of the Ku Klux Klan is also in prospect. Even the governor's voluntary retirement, which is possible and even expected, would have no effect upon the legislative probe. According to one report the governor will go before the legislature, deliver his message, explain his gubernatorial acts, proclaim his attitude toward the klan, demand its dissolution and then quit.

The legislature will caucus Wednesday night preparatory to assembling Thursday morning. If W. B. McBee can be prevailed upon to accept he will be elected speaker, in place of Murray Gibbons, pro-Walton, presiding officer at present.

The governor's special session proclamation was filed formally last evening. Immediately urgent messages were sent out by McBee's committee for all members to be in their seats at the time fixed.

The hint of federal investigation came from Tulsa, where Federal Judge R. L. Williams, former governor of Oklahoma, delivered his charge to the grand jury. In his charge he said: "Citizens are guaranteed the right of trial by jury and representation by counsel. Persons and property are to be protected from unlawful search or seizure. No court, no governor, no officers, no congress or legislature, can take these rights away. If no governor or legislature can do it, it follows that no private citizen or assembly of citizens can do it. Any such assembly is nothing but a mob."

The suggestion that "both sides" be investigated was contained in this paragraph of the charge: "You stand in the presence of your country and the God of hosts in making these investigations, and if there ever was a time when a grand jury should consider the law carefully, it is at a time as this in Oklahoma, where on one side the executive has trampled it under foot and on the other the mob has trampled it under foot." Judge Williams last Thursday organized election officials in his home town, when he and others were denied the privilege of votes and cast the ballots in an improvised ballot box.

CONDEMNS HOME BREW

Health Officer Says Consumers Are Slowly Committing Suicide.

Chicago, Oct. 9.—Consumers of home brew are slowly committing suicide, according to Herman N. Bundesen, Chicago health commissioner. Bundesen has just completed laboratory tests of 2,000 samples of various home brews and beers. All of them contained poison, formed by improper fermentation and lack of understanding of the science of brewing. Some of the things he found were formic acid, aldehyde, acetic acid, lead copper, arsenic and salicylic acid. Drinking such poor booze, Bundesen declared, causes ulcer of the stomach, catarrh, puffiness under the eyelids, numbness, skin eruptions, paralysis, digestive disturbances, destruction of kidneys and general ruin of health.

Crap Game Raided.

Akron, O., Oct. 9.—Four men were arrested here following a raid on a downtown "crap" game in which the stakes ran well into the thousands of dollars. One man had \$6,000 in his purse.

THE WEATHER.

Ohio—Wednesday: Fair; little change in temperature.

SEVERAL OBJECTIONABLE

Democratic Senators to Fight Confirmation of Recess Appointments.

Washington, Oct. 9.—Democratic senators are laying their lines to fight confirmation of a number of recess appointments made by the late President Harding after congress adjourned last March. When the new congress convenes in December there will be a long list of these appointments, representing nearly every branch of the government and including many high administrative places, for President Coolidge to send to the senate, unless he sees fit to exercise his prerogative and substitute other names for the incumbents. Democratic senators are proceeding on the assumption that President Coolidge will stick by the Harding appointees and are preparing for a finish fight on some that are particularly objectionable. The outstanding cases are Walter L. Cohen as collector of the port at New Orleans and Joseph W. Tolbert as United States marshal for the western district of South Carolina. Both were rejected by the last senate.

Gas Case to Be Reviewed.

Washington, Oct. 9.—The request of West Virginia for a review of the cases brought against it by Ohio and Pennsylvania in which was involved its right to place restriction upon the quantity of natural gas sent into adjoining states was granted by the supreme court and the case set for hearing Nov. 19. In a decision last June the court held that the gas had entered interstate commerce and that under federal constitution West Virginia could not place any restrictions upon its exportation to other states.

"MONEY MADNESS"

New Disease Spreading in Germany as the Mark Goes Toward Zero.

Berlin, Oct. 9.—"Money madness," a new disease, is spreading in Germany as the German mark and the Russian ruble are racing neck and neck towards absolute zero. Doctors report that the strain of constantly computing ordinary business transactions in astronomical figures is causing frequent mental breakdowns. Most purchases, even the price of meats, are computed in billions and stocks sometimes jump billions of per cent in a day. A symptom of the disease is a mad desire to fling money away. Papers report daily incidents of people throwing money in the street by the basketful, often causing embryo riots. More aggravated cases of this mania have led to a number of suicides.

Radical Leader Unseated.

Portland, Ore., Oct. 9.—By a vote of 27,838 to 130 of the 28,538 votes on the delegates to the convention, William F. Dunne, editor of the Butte, Mont., Bulletin, radical leader and member of the workers party, was unseated as a delegate to the convention of the American Federation of Labor. Dunne is one of the defendants in the Michigan syndicalistic cases awaiting trial in Berlin county, Mich., and is a follower of William Z. Foster, radical.

MARKET QUOTATIONS

CHICAGO, Oct. 9.

Cattle—Top steers, \$12 50; bulk of sales, \$8 50 to 10 50; stockers and feeders, \$5 75 to 7; calves, \$8 75 to 12.
Hogs—Top, \$8 25; bulk of sales, \$7 20 to \$8 20; packing sows, \$6 85 to 7 10; pigs, \$6 50 to 7 25.
Sheep and Lambs—Native spring lambs, \$9 12 75; ewes, \$6 25.
Receipts—Cattle, 30,000; hogs, 60,000; sheep and lambs 25,000.

CLEVELAND, Oct. 9.

Cattle—Steers, \$5 50 to 10 25; heifers, \$5 75 to 10; bulls, \$4 50; cows, \$2 50 to 5 50; calves, \$6 14.
Hogs—Yorks, \$3 40; heavies and mediums, \$3 50; pigs and lights, \$7 50; roughs, \$6 75; stags, \$4 50.
Sheep and Lambs—Lambs, \$11 13 85; sheep, \$2 50 to 5 50.
Receipts—Cattle, 1,500; hogs, 6,000; sheep and lambs, 2,000.

PITTSBURGH, Oct. 9.

Cattle—Steers, \$9 50 to 10 25; heifers, \$6 50 to 7 50; cows, \$5 25 to 6; calves, top, \$14.
Hogs—Heavies, \$8 70 to 8 85; heavy yorkers, \$8 70 to 8 90; light yorkers, \$8 85 to 9; pigs, \$7 50 to 8.
Sheep and Lambs—Top lambs, \$14; top sheep, \$8.
Receipts—Cattle, 1,500; hogs, 7,500; sheep and lambs, 4,000.

CINCINNATI, Oct. 9.

Cattle—Steers, \$4 50 to 5 50; heifers, \$3 50 to 4 50; cows, \$2 75 to 3 75; calves, \$4 13 50.
Hogs—Heavies, \$8 65; packers and butchers and mediums, \$8 65 to 8 85; light shippers, \$7 75; fat sows, \$5 50 to 7 55; pigs, \$5 50 to 7 55; stags, \$3 50.
Sheep and Lambs—Lambs, \$5 14; sheep, \$1 50 to 6.
Receipts—Cattle, 4,350; hogs, 7,500; sheep and lambs, 400.

BALTIMORE, Oct. 9.

Butter—Fancy creamery, 45 to 46c; Ohio rolls, 39 to 41c; store packed, 29c.
Eggs—Ohio firsts, 37c.
Live Poultry—Young chickens, 21 to 27c; old hens, 15 to 20c; old roosters, 14 to 15c.

BOSTON, Oct. 9.

Wool—Ohio and Pennsylvania fleeces: Delaine unwashed, 5 to 6c; fine unwashed, 48 to 49c; one-half blood combing, 54c; three-eighths blood combing, 51 to 53c.

TOLEDO, Oct. 9.

Wheat, \$1 14 to 1 15; corn, \$1 04 to 1 05; oats, 43 to 44c; cloverseed, \$17 60.

The Uninformed.
At the height of the Derby fever in London two men were arguing on a literary subject on the top of an omnibus: "Well," said one, "John puts 'Bleak House' first and 'Martin Chuzzlewit' second." A hoarse voice interrupted from the seat behind, "Gentlemen," it said, "I don't know your pal John, but you're bein' had. There's no such horses runnin'."

Flowers as Timekeepers.
The dandelions open in the morning and close in the evening at the same time every day. The hawk weed and goat's beard are quite as regular. If the right subjects were planted it would, no doubt, be possible to have a bed of flowers that would tell the exact hour of the day from sunrise to sunset.

HOW MUCH WATER

Has Flowed Under the Bridge Since You First Might Have Begun to Save?

How much of your river of life has flowed by and left nothing but remembrance behind? When it goes over the mill wheel of a savings account it steadily creates wealth for you as it passes by. Interest is compounded semi-annually.

CROOKS FOOL YOU WITH DISGUISES

Clever Criminals Alter Their Appearance Before the Crime.

IDENTIFYING MARKS ARE FAKED

Every experienced detective knows that as a general rule the amateur crook commits a crime and then attempts to effect a disguise, while the professional disguises himself and then commits a crime. The novice tries to escape while in disguise, while the professional relies upon his natural appearance to escape detection and arrest.

Years of experience with criminals have taught the police throughout the world to be suspicious of unusual facts when personal descriptions of criminals are presented for their information and guidance. Crooks know if they can make it appear that they have a long gash on the right cheek and can expose that gash frequently, that that mark will make such an impression that when a description is prepared later nothing else can be remembered. And, of course, after the crime, the crook removes the "gash."

Years ago when beards were common, false whiskers and false mustaches were used a great deal by criminals. Today tight-fitting wigs have taken their place. A criminal is described as having coal-black hair. The removal of his wig reveals him a blond.

Crooks also know that nine persons out of ten cannot describe either a man or woman. If any details are remembered they are usually details about dress, which mean nothing.

Unable to Agree.

Prof. Hugo Munsterberg, the famous Harvard professor, who was one of the profoundest students of criminology this or any other country ever produced, conducted numerous experiments to prove that most men and women cannot report accurately what they see. One of his favorite experiments was to have two men unexpectedly stage a mock fight in the classroom. After the men had been ejected from the room and all was quiet, Doctor Munsterberg would ask his students to describe what they had seen. And the conflicting details that were submitted were startling.

Criminals have been known to disguise their walk. Policemen particularly know that a man's walk is an easy method of identification. Criminals have been known to go into banks and stores, with a limp and with some definite mannerism which would identify that person personally if the method of walking was real. The unusual walk immediately attracts attention and other facts are ignored.

One of the keenest students of criminology in this country, Charles E. Robb tells of a forger who was always described as a very full-faced, fat man. He was frequently shadowed only to be lost in buildings. Detectives would wait on the outside for the return of the fat man, little knowing that the thin-faced, thin man who left while they were watching was the man they wanted. It developed that this man wore a rubber poncho beneath his overcoat and that with a hand pump he blew this up, giving him the appearance of an enormously fat man. With the aid of cotton he made his face look full, also. He stuffed cotton in his mouth over his cheek bones. A study of the rogues' gallery pictures of this man is very amazing.

Crooks have been known to pretend that they had clubfoot, stiffened arm, deformed hand, and, of course, these details caught the eye of the person they came in contact with and other details which should have been remembered escaped them.

Marks Faked.

The average person will immediately notice a birthmark, a wart, or tattooing on one's face, neck or hands. Crooks know this and have succeeded in throwing police off their trail by faking such marks.

A well-known railway pickpocket in England, at the moment of effecting a big theft, made on his cheek a large mole with carpenter's glue mixed with grated leather.

Criminals who have had real identifying scars have been known to commit crimes and then to have gone to dishonest so-called beauty doctors, and had their scars removed. This resulted in certain studies being made in France, which led to the discovery that if the skin is beaten with the palm of the hand gently but firmly for a few minutes any old scars will be revealed. The old scar will appear white and in its original shape, while the skin around the scar will be red.

Whenever a criminal commits a crime he usually watches the papers for a description of himself. He notes every detail and then proceeds to alter himself so that the description will not fit. It has been long debated whether it was wise to publish descriptions of criminals because such descriptions always fall into the hands of the criminals themselves.

Large Telescope for Argentina.

A 60-inch reflector has recently been completed by a Cleveland optical works for the Argentine National observatory. The mechanical equipment is unusually accurate and the entire instrument is a credit to the optical skill of a great firm of builders of machine tools.—Scientific American.

BEAVER A REAL ENGINEER

Wonderful Work of Tribe of Small Animals in Yellowstone National Park

A healthy increase in the beaver population of the Yellowstone National park is reported from many quarters. Some of the famous old beaver ponds and lodges have been abandoned, but there is new activity in many areas.

A scientific study of beaver begun in former years was continued this year by Edward R. Warren, naturalist of the Roosevelt wild life forest experiment station at Syracuse, N. Y. He has spent the entire summer in the northeastern section of the park, where beaver are especially active. The beaver in that region are as numerous as natural conditions will permit, and a surplus of population has compelled many of the animals to seek new feeding grounds and build new dams and lodges.

The beaver makes his habitat in proximity to aspen groves. In the vicinity of Camp Roosevelt large groves of these trees have been cut down, the bark used as food and the logs for construction purposes. The beaver has been obliged to abandon a famous series of beaver ponds in Lost creek beside the Cooke City road.

The increasing beaver population is attributed in part to the reduction in number of coyotes and wolves within the park. These predatory animals, great foes of the antelope and baby elk, have been systematically hunted by rangers during recent winters. Mr. Warren suggests a possibility that the beaver population may eventually reach a point where reduction may become necessary. This could be accomplished by trapping beaver families and sending them to other national parks or regions where the restoration of this valuable American animal is being attempted.

Marvelous engineering work of the beaver is described by Mr. Warren in a publication, "The Life of the Yellowstone Beaver." Beaver use four different types of construction, he writes—dams, lodges, burrows and canals. He regards the canal as in many respects the highest engineering achievement. "To deliberately plan and dig a channel in which to float logs to a pond, and not only that, but to build dams in this channel to hold water to a desired level, is an intelligent act." On Tower creek Mr. Warren found two such canals, one ninety feet long and another 150 feet.

Books by the Million.

Have you ever pondered how many books there are in existence? On the average, 200,000 volumes are published each year throughout the world and, as 8,500,000 books appeared last century, one can obtain a fairly good idea of the size of the world's book shop.

Adding together the number of volumes published in each century since printing was invented, the astonishing total of 60,000,000 is reached. The amount of energy, time, paper and printer's ink which have gone to produce all these books is incalculable.

A great many of these publications are each worth more than \$5,000, and the total value of the world's book stocks must run into many millions. Stacked together, they would form a fair-sized mountain, the ascent of which would take several hours.

The three largest libraries in the world are the British Museum library, which has 4,000,000 volumes; the Bibliotheque Nationale at Paris, which has 3,000,000, and the Library of Congress at Washington, with just 500,000 less. Thus, among them alone these three great institutions possess 9,500,000 books of all kinds.—London Tit-Bits.

Clock Mending a King's Hobby.

Few kings have had more power or a stranger hobby than Charles V, emperor of Germany and king of Spain in the sixteenth century, and the greatest potentate of his time. Finally the king business pulled on him to such a degree that he determined to give up the world and retire to a monastery.

According to a story, a clock in his cell failed to keep proper time. With his own hands he set himself to make the clock keep time. Then he looked around the monastery and laid hold of another timepiece that was out of tune.

If one may believe Charles' chronicler, he made out well with the two clocks. Then the idea occurred to him of bringing in all the clocks in the neighborhood that needed mending, oiling and refurbishing. Work benches were provided. Charles donned an apron and toiled early and late upon his clocks. Toward the end he had more than 100 clocks of all sorts, and it was the passion of his last days to make the whole lot keep the same time.—Detroit News.

Sending by "Bottle Post."

A bottle from the hydrographic office, containing a slip of paper on which was recorded the fact that it was dropped from a ship in latitude 12 degrees 7 minutes north, longitude 76 degrees 53 minutes west, which is in the Caribbean sea about 300 miles northeast of Cristobal, was recovered at Galeta Island, seven miles northeast of Cristobal. It had traveled 290 miles in 12 days, about one mile an hour.

And Women Are So Constant.

Pauline—Men are the most changeable creatures on earth.

Josephine—What makes you think that, dear?

"Well, only a fortnight ago I was desperately in love with Dick, and now I cannot stand him!"—London Tit-Bits.

AERIE OF EAGLES

Congressman Reilly Will Make Address in Memorial Hall Tuesday Evening.

The Hon. Thomas L. Reilly, of New Haven, Connecticut, a former member of congress, from that state, will be in Circleville on next Tuesday and deliver an address in the evening at Memorial hall.

THOMAS L. REILLY.

This meeting is given under the auspices of Circleville Aerie of Eagles and Congressman Reilly has a message to deliver which will be of interest to every resident of Circleville.

The meeting will be of a public nature and all are invited to be present and hear this excellent address.

In addition to the address by Mr. Reilly a pleasing musical program is being arranged by the local committee.

FARMS FOR SALE.

Ford
THE UNIVERSAL CAR

New Touring Car

Looking at the new touring car from the side, you are at once favorably impressed with the effect of longer, more graceful lines secured by enlarging the cowl and raising the radiator.

Slanting windshield and one-man top lend material aid in giving the entire car a lower, more stylish appearance.

An apron connecting the radiator with the fender skirts is also a decided improvement.

A comfort feature much appreciated by owners, is the additional leg room provided by the enlargement of the cowl.

Allow us to show you the entire line of new Ford cars now on display in our show room.

These cars can be obtained through the Ford Weekly Purchase Plan.

Fundamental Human Need.
It seems to me a great truth that human beings cannot stand on selfishness, mechanical utilities, economics and law courts; that if there be not a religious element in the relations of men, such relations are miserable and doomed to ruin.—Carlyle.

In the Same Class.
There isn't a whole lot of difference between the fellow who didn't know it was loaded and the theorist who never knows when his theory is going to explode.

Dancing for Growing Child.
An awkward and angular period of growth is passed through by quite a number of girls and boys. Sympathetic treatment should be accorded these young sufferers, and physical training given. In the latter dancing is admirable, its rhythm and harmony making their appeal. In dancing physical activity co-operates with the mental facilities, and under their combined influence the angularity and heaviness of the growing child disappear with the acquirement of perfect balance.

Pick Out a Beech Tree.
When in full foliage the beech tree is remarkable for its close shade and coolness. The branches and such parts of the tree as cannot be more usefully employed make capital firewood.

APPLES! APPLES!
Our large crop of well sprayed Winter Apples are now ready for market. We make a specialty of Orchard sales. Pay a visit to our orchards and select your winter's supply of apples. Two miles east of East Ringgold. Grandview Fruit Farm.

CIRCLEVILLE, OHIO

Smartly Cut Sweater Coat of Varied Colors

Showing a smartly cut sweater coat of varied colors. It is worn with a white plaited Canton skirt. The hat is of Japanese straw in blue.

Faille Ribbon Holds Lead for the Season

Wide printed satin and faille ribbons challenge grosgrain for its acknowledged leadership. Entire belting ribbon crowns or facings and crowns accompany timbo trims often enough. At least irregular brim edges of some otherwise regular blocked shapes are of necessity chic and those bound with ribbon—and not a stereotyped binding either—whipped over, or fluted edged ribbon run riot at present. Straw, hair and viscose woven ribbons are entering the style field, too—and will mean much ere summer's here. However, far more latitude is allowed in materials this year than in color, shape or trimming.

There are two sides to the choice of color—one the costume hat, the other the smart new hat established by the grande maisons. Color does not play solitaire in one smart shade, but answers "present" in many tones. Blended shades—capucine, purple, opal to Cleopatra effects standing out—but black and white are equal ends of the rainbow to choose from and are often allied.

In fact, black and white are spelling spring in engraved capitals. Cerise and navy form another combination that the French think well of always, but this year there are berry and navy, gray and navy or navy with almond green, perchance.

The utter absence of color makes an early appearance this season. White is winning its way beyond all dreams for this time of the year. It was tried out slightly in winter just before the silk hats came in, but it did not register a big hit. However, from the trend of things fashionable at present white is to become a prominent factor—and a successful one.

Coats, Jackets, Frocks in the Fashion Picture

Top coats for spring show large plaids and checks in camel's hair, basket weaves, fleeces, tweeds and other soft materials.

The velvet coat is losing its tailored lines and severe effect and is being trimmed with a braid and with smuffs of lace, which have a softening, flattering way.

Quilted silk is used to make smart little short jackets that are worn with straight, plain skirts. Sometimes heading, embroidery or braiding is used about the collar and cuffs. In Paris, these quilted garments are extensively shown.

Gorgeous evening wraps are made of shimmering gold or silver cloth, hanging very full from the shoulders and collared with white fox or white ermine.

Linens for the coming summer are frequently embroidered heavily in self or in contrasting colors, or printed with Persian or Paisley designs.

A smart straight-line frock of yellow moire is worn over a slip of satin a trifle darker in tone, and girdled elaborately with pearls a trifle below the natural waistline.

Girls' Paris Frocks.

Straight from Paris are the most exquisite little frocks for the small daughter. They are made of the sheerest voile put together by hand and with effective contrasts of color. One of white has strawberries embroidered on the skirt. Another has narrow bands of rose color inserted with fagoting. A third of peach color is bound with blue.

Ermine Scarf.
At the opera recently was seen a gorgeous scarf of white ermine, edged with long white fringe. It was slightly smaller than the regulation Spanish shawl.

Bible Thought for Today

JESUS' INSTRUCTIONS.—Provide neither gold, nor silver, nor brass in your purse; nor scrip for your journey, neither two coats, neither shoes, nor yet staves; for the workman is worthy of his meat.—Matt. 10:9, 10.

SOCIAL CALENDAR

Mr. and Mrs. J. W. Weaver, of Turlington, entertained to dinner Sunday. Covers were laid for Mr. and Mrs. M. S. Judy, Mrs. Rosette Turner and son, Emanuel, Thelma Carrol and little daughter, Virginia May, of Laurelville Mr. and Mrs. R. L. Judy and daughter, Iva, of Pickerington. Mr. and Mrs. Frank Turner and daughter, Catherine of Circleville and Leon Butts, of Lancaster.

The marriage of Miss Miriam Smith, of Williamsport, daughter of Mr. and Mrs. John W. Smith to Mr. James Kendall Bryan, of Parkersburg West Virginia, was solemnized Saturday evening at 7:30 o'clock at the Williamsport Episcopal church. The ceremony was performed by Dr. John W. Hoffman, president of Ohio Wesleyan university assisted by Rev. R. L. Cross, of Williamsport. The church was very beautifully decorated with gladioli and southern smilax and before the bridal procession Mrs. W. B. Johnson sang "To a Water Lily" and "To a Wild Rose" and Mrs. John Dunlap sang "Oh, Promise Me" accompanied by Miss Helen Betts at the piano and Miss Alice Speece, of Parkersburg on the harp. The bride's little sister, Virginia, acted as ring bearer and Alice Tipton as flower girl. The matron of honor, Mrs. I. H. MacKinnon, of this city, the maid of honor, Miss Emmy Lou Carpenter, of Cleveland and the six bridesmaids, Misses Faye Blacker, of Cincinnati; Thelma Rickey, of Portsmouth; Virginia Warner, of Newark; Flora Booth of London; Helen Bennett of this city, and Mrs. Wallace McCoy, of Springfield, were attired in chiffon dresses which ranged from a very deep shade of lavender to a pale orchid. The bride was a perfect picture of youth and beauty in her wedding gown of white crepe roumaine, made with a bodice of crystal and pearl beaded design. Her tulle veil with a flared arrangement on one side, was held in place by a cornet of pearls and orange blossoms. She carried a shower bouquet of bride roses and swansonia, arranged with lilies of the valley, while her attendants carried bouquets of chrysanthemums. Immediately after the ceremony a reception was held at the home, of the bride's parents, after which the couple left for an extended honeymoon thru the south. They will be at home in Parkersburg, West Virginia. Both the bride and groom are graduates of Ohio Wesleyan university and both were very prominent in student activities he being president of Student Council and she president of Women's Student council, and secretary of her class. Mr. Bryan is a member of Phi Delta Theta fraternity.

Sunday at their home on East Main street Mr. and Mrs. Solomon D. Riegel celebrated the fiftieth anniversary of their marriage. Those present were their daughter, Mrs. Earl Swinehart and son, Mr. Darwin Swinehart, of Baltimore, Maryland; Mr. and Mrs. Howard Koch and daughter, Miss Mary, of Columbus; Mr. and Mrs. Fred C. Clark and daughter, Dorothy, and Mr. and Mrs. Harry R. Riegei, of this city.

Misses Harriet and Mary Marfield gave a breakfast party to the house guests of Miss Annette Groce, who are here to attend the Will-Groce wedding.

On Wednesday evening, October 10, the congregation of St. Andrew's Mission, Washington C. H., are giving a reception for Rev. and Mrs. R. L. Baird, of this city. Rev. Baird has St. Andrew's under his charge and holds services there each Sunday evening. To this reception all friends here are cordially invited. If you are planning to go over please notify Mr. Baird so he may in turn notify Washington how many to expect. The time is 7:30.

A good farm consisting of 104 acre tract with 8 room frame dwelling, 3 good barns, 2 room pupm station, scales, silo, cement corn crib, large cattle barn and windpump, well drained and fenced with 12 acres of growing alfalfa, located on paved pike just out of the corporation with lowest tax rate in the county. Within 100 yards of traction station, good market and school. If sold in a few days possession can be given at once. We regard this a fine location for a home.

The Cause.
Every reporter knows that the flatness of his story is due to his falling down on it.—Boston Transcript.

BADLY BRUISED

Henry Davis Thrown From Truck While Stringing Wires.

Henry Davis, employed as lineman by the Ohio Utilities company, was injured this morning while stretching wires for illumination of Main and Court streets.

Mr. Davis was standing on top of the truck in front of the Memorial hall with a wire in his hands when an auto truck going east came along and got tangled up in the wire and pulled Mr. Davis off. In the fall his arms, legs and nose were badly bruised and skinned and his back wrenched. He was taken home in the Ohio Utilities truck. Dr. H. D. Jackson is attending to his injuries.

Forging Stirrups.

The automobile has done much to destroy some of the industries connected with riding and driving. The forging by hand of hard steel stirrups, which used to be a flourishing industry, is nearly dead. It was work which required great skill, a trade which took a lifetime to learn properly. It is probable that very few men can be found today who are capable of forging a first-class stirrup out of a rough bar of steel.

GOOD ADVICE.

All that Circleville needs to start an industrial revival is for its citizens to forget self and join hands in a whole hearted movement in bolstering up industry.

If each person will forget petty personal jealousy, stop knocking and begin to boost in an effective manner the city can easily double its population in five years at the same time doubling the value of every foot of property in the city. Boost, don't knock.

James J. Hinde.

Our want ads bring results.

AMUSEMENTS

How many elements of characterization are necessary to a successful motion picture? In William de Mille's Paramount production of "Grumpy," which comes to the Met theater next Monday every essential is made use of. The cast carries on the story in a most pleasing fashion.

"Grumpy" for example, played by Theodore Roberts, one of the featured players, is a lovable, peculiar old character whose keen brain and quick wit saves every situation and who approves heartily of

Conrad Nagel, who enacts the role of Ernest Heron, a featured part, a clean-cut, pleasing young man who is entrusted with the \$500,000 diamond. Ernest is in love with

May McAvoy (featured with Roberts and Nagel in her role of Virginia Bullivant, daughter of "Grumpy") May is sweet and winsome at the age when romance rules her woman's heart. She is, therefore, divided between Ernest and

Jarvis (played by Casson Ferguson) who is at heart a villain and seeks to marry Virginia for her money. Jarvis attempts to get the diamond, in fact, does get it and tries to sell it.

Wolfe, one of England's worst fence for buying stolen jewels (played by Charles French. But Wolfe stays off.

Other characters in the story who lend to the mystery, to the comedy, the romance, thrills and the general plot are Susan the maid played by Bernice Frank and the parts of Keble Duddock and Dawson, played respectively by Bertram Johns, Charles Ogle and Robert Bolder.

FRIEDMAN'S

APPAREL FOR WOMEN

LONG ILLNESS

Mrs. Clarence Cutright Succumbs to Cancer—Burial at Chillicothe.

Mrs. Alice Cutright, daughter of George and Elizabeth Kinnaman Overly was born in Ross county May 30, 1879, and died at her home near Harveysburg, September 28, 1923, after an illness of four years of cancer. She was united in marriage to Clarence Cutright December 2, 1903 and to this union were born, Paul and Nellie, both of whom survive. Her husband preceded her to the grave.

Besides her children she leaves to mourn her loss two sisters, Mrs. Emma Bower and Mrs. Annie Knab, both of Chillicothe; also three brothers, Thomas Overly, Williamsport; George Overly, Columbus, and Lewis Overly, Chillicothe. She was converted when quite young and joined the Mt. Carmel Methodist Episcopal church 11 years ago.

Short services were held at her home at one o'clock Sunday by Rev. Mr. Bennett of Harveysburg. The body was taken to the home of Mrs. Emma Bower and funeral services were held Monday morning at 10 o'clock. Rev. R. A. Smith officiating. Interment in Greenlawn cemetery, Chillicothe.

HARRY RUCKMAN

Died of Dropsy—Funeral Services and Burial Thursday.

Harry Ruckman died at the home of his sister, Mrs. Isaac Fowler, of North Scioto street, Monday evening at 11:15 o'clock. The deceased had been ill five weeks of dropsy.

He was born in Champaign county, Illinois, February 27, 1872, and was the son of Wilson and Anna Newport Ruckman. He married Miss Laura Metzger, who survives. Mr. Ruckman was a member of the United Brethren church.

He is survived by a stepdaughter, Mrs. Frances England, his father, one sister, Mrs. Isaac Fowler and two brothers, Willard Ruckman, of Columbus and Fred Ruckman, of Toledo.

The funeral services will be held Thursday afternoon at 2 o'clock at the home of his sister, Mrs. Fowler. Rev. Hiles will officiate. Interment in Forest cemetery.

Mrs. Artie Lucas went to Piqua today to visit her son, C. Herbert Lucas, and family.

Mrs. J. S. Smith and daughters, Misses Louise and Elizabeth, spent the day in Columbus.

Muri Smith, who is attending Washington college, spent the weekend with his parents, Mr. and Mrs. J. E. Smith.

Miss Rose Christy, Miss Mary Smith and Mr. Boyd Smith spent the weekend in Gallon visiting Miss Helen Christy, a commercial teacher of the Gallon high school.

Orrin L. Gessley left today for Washington D. C., to attend the meeting of the National Association of Postmasters that will be in session October 10, 11 and 12.

Mr. and Mrs. George P. Hunsticker and his daughter, Mrs. Walter Duvendek, of Williamsport, went to Columbus today to be present at the meeting of the Knights-Templar state convocation.

Misses Mary Pope, of Detroit, Michigan; Elizabeth Allen, of Burlington, Vermont; and Susan Brown, of Yonkers, New York, arrived this morning to attend the Will-Groce wedding this evening.

Miss Lucile and Pauline Denman have returned from Marion, Ohio, to make their home with their grandmother, Mrs. Alice Strawser, of 526 East Union street. Alice Denman, who is in the second year of high school will make her home with her aunt and uncle, Mr. and Mrs. A. H. Morris, of Columbus, who will send her thru school.

Many Languages in Philippines. Such a variety of races are represented among the inhabitants of the Philippines that they speak a total of more than thirty languages.

One hundred and eighty local people have subscribed to the Hind Box company \$25,200. Subscriptions now and help get this fine institution started.

Many Languages in Philippines.

Numerous languages or dialects are spoken in the Philippines, but with one or two exceptions they are transformations of the Malay tongue. Difficulties of communication between tribes has caused this differentiation of speech. In some instances two or three distinct dialects are spoken in a single tribe. Spanish was the official and commercial language before the coming of the Americans to the islands, and was spoken among the upper classes. Even today some of the Filipinos know only Spanish. English is, however, coming into wider use, and is taught in the schools as a part of the regular curriculum. As yet, though, it can in no way be said to be the universal language of the islands. Tagalog, Vlasya and Ilocano are the native tongues most widely spoken. They sound like gibberish to the English ear.

Wise Men of the East.

In ancient times there were "wise men" in Persia and Media, who knew, or were reputed to know a lot of things the common people didn't know. They studied the skies, the stars, the storms and the hold books and told the people what they thought they ought to know. These wise men were called magi—hence the word "magic," says the Detroit News. A myth is a fable, an allegory, a fictitious story, contrived to carry some sort of a moral or lesson. Some authorities class parables along with myths and allege that parables, allegory and myth are the result of conscious invention originally designed by some one who probably knew better, to deceive or mislead some one who didn't know better.

Art a Translation.

"I do not know," says Audrey to Touchstone, "what 'poetical' is. Is it honest in deed and word? Is it a true thing?" "No, truly," says Touchstone, "for the truest poetry is the most feigning." Out of the mouth of fools comes forth wisdom (when the voice is the voice of Shakespeare), but poetry in quest of fact has sometimes evoked a kinship with the bewildered intellect of Audrey. I am dwelling persistently upon illusion, because the fundamental conventions of poetry grow inevitably out of the fact that art is what it is, a translation, not a transcript.—John Lowes, in "Convention and Revolt in Poetry."

Indians as Beasts of Burden.

Because labor is so cheap, Indians in Bolivia, South America, are beasts of burden, trudging along with huge loads at less cost than motor trucks. There are few cars even in the capital, where tiny burros and queer-looking llamas with packs pass up and down the streets, guided by natives, also heavily laden. In this city, founded almost 400 years ago by Spaniards, labor-saving ideas are almost unknown. In digging for a store in the capital, recently, Indian men and women carried away all the dirt in small baskets on their backs.—Popular Mechanics.

Hottest Country.

The sultan of Muscat rules what is probably the hottest country on earth. A Fifteenth century traveler wrote of Muscat, "The heat was so intense that it burned the marrow in the bones, the sword in its scabbard melted like wax, and the gems that adorned the handle of my dagger were reduced to coal." Possibly a little exaggerated. Still, the thermometer has registered 150 degrees in the sun in Muscat and 107 degrees even at night, so the visitors are grateful for those grapes that Muscat christens by the sweat of its brow.—Pittsburgh Post.

Bible in Translation.

The Bible is far in advance of any other book in the number of its translations, for it has actually been rendered in whole or in part into 770 languages and dialects and the end is not yet in sight. The translation is still progressing at the rate of one complete book of the Bible in a new language every six weeks, a speed record which has been maintained for over twenty years.—The Mentor.

Making of Art.

The making of art is a process of boiling down a great deal of life into the essence of art—a process of condensation. The appreciation of art is a process of living oneself out into its multitudinous separate manifestations—a process of expansion. For the artist, life is for the sake of art; for the appreciator, art is for the sake of life.—Virgil Barker, in The Arts.

A Cosmopolitan.

Joe-Bill, what's a cosmopolitan? Bill—Well, suppose you was a Russian Jew livin' in America, and married to a Chinese woman, and you had just finished an Irish stew and you was smokin' a Turkish cigarette, while a nigger band outside was playing "The Blue Bells of Scotland," then you'd be a cosmopolitan.

Scots Made Pistols.

Before the advent of the American revolver, the Scottish cities of Perth, Stirling and Dundee were great centers of the pistol-making industry. Scottish pistols were famous as far back as 1515, and were exported to many countries. There were at one time nearly 100 concerns in Scotland engaged in the industry.

Sholes' Prediction.

Christopher L. Sholes, inventor of the first typewriter to be commercially successful, is said to have predicted that his invention would prove one of the greatest factors in the emancipation of women, by enabling them more easily to earn a living.

WHAT AND WHY OF AN EARTHQUAKE

Caused by Earth Waves Originating in Inner Regions.

TWO PRINCIPAL WAVE TYPES

Exactly what is an earthquake and what causes it?

These two questions very naturally pop into the minds of millions of persons when a catastrophe such as that which recently occurred in Japan overtakes some great city and causes thousands of deaths.

A bulletin from the Washington, D. C., headquarters of the National Geographic society answers these questions:

"Superficially the name itself tells the story. It is no more nor less than a quaking of the earth or a part of it; and theoretically any vibration at all fills the bill, from the tremor caused by a heavy truck passing along the street or a blast in a nearby quarry to the most violent convulsion that slides hills from their bases and opens yawning chasms in the earth."

Earth Waves Hold Secret.

"But going beyond the superficial, there is more that needs to be said even by way of a bare definition of an earthquake. The quake in so far as man experiences it is the coming to the surface of waves in the earth. These waves cannot be compared simply to the up-and-down waves of rippled water nor to the back-and-forth waves in the air that make sound. Even the simplest wave motion is none too easy to understand; and the waves in the varying earth materials that make themselves known to man as earthquakes are probably the most complex waves that exist. They are at once motions 'up-and-down' like sea waves; crosswise like the waves in a flapping flag; back-and-forth like sound waves or the motion in a long coiled spring suspended with a weight bobbing at its end, and in addition may have twists about imaginary pivot lines in all of the three dimensions."

"The earth waves originate in some region down in the earth and start out in every direction. The waves from a pebble dropped into a pond form growing circles on the surface of the water. But the waves in the earth being in a solid, attempt to form spheres that constantly grow outward. Soon, however, because of the difference in the rigidity of different rock materials, the form is not a sphere at all but a very irregular curved solid instead, more nearly that of a potato, perhaps."

Two Kinds of Waves.

"The two principal types of earth waves, those that travel like the pulsations in a bobbing spring, straight out; and those that travel like ripples and the waves in a flag, with a sidewise motion, move at different speeds. The pulsing waves are the swifter, and of course the place where they make themselves felt first and most strongly is the surface area straight above their starting point. This is technically the 'epicenter' or 'epicentrum.' The pulsing waves around the epicenter alternately push up the surface of the earth and everything on it, and let them fall back. This is done very rapidly, and though the actual rise and fall may be only a fraction of an inch on rocky surfaces or a very few inches on soft soil, the violence may be like that from innumerable tremendous blows, and sufficient to shake down buildings."

"The 'sidewise' waves follow along almost immediately after the first pulsing waves, and the two, with perhaps 'twisting waves' as well, then operate together. The ground in the epicentral area, therefore, gets innumerable thrusts and falls and at the same time is jerked sidewise and back for tiny distances in every direction."

"At points some distance from the epicenter the pulsing waves strike the surface at a slant and so accentuate the effects of the 'sidewise' waves and create new surface undulations. The shaking at the epicenter, too, throws the earth's surface there into undulatory waves like ripples on a pond, and these also travel outward in widening circles. These surface waves are those of greatest motion but least speed. They register the heaviest vibrations on the seismographs of the world."

How the Waves Start.

"The second important question in regard to an earthquake is: What starts the waves?"

"No one has ever seen an earthquake wave start outward from its center, and it is safe enough to say that no one ever will. But science has built certain hypotheses about the matter that seem to account satisfactorily for the happenings, and which are accepted pretty generally."

"Hold a dry stick as big as your thumb in your hands and bend it until it breaks. At the snap waves will travel to your hands and usually give you a quite painful sensation."

"Hold an iron bar by one end and strike the other sharply with a hammer. Again the vibrations carried to your hand may be violent enough to produce a stinging pain."

"And if you should strike a small explosive cap with the end of a long rod grasped by the other end, the explosion would probably bring the same painful tingle to your fingers."

Breaks Probably Most Important.

"It is generally believed that earthquake waves flow from a point where one of the three forces illustrated is suddenly released—a break, a blow or an explosion. Breaks are credited

with the responsibility for most earthquakes. It is believed that because of slow contraction or shrinking which may result from the cooling of the outer portion of the earth or because of pressure from deposited silt, strains are set up below the surface like those in the bending stick. Eventually the strain reaches the breaking point and there is a snapping of the rocks which sends violent waves to the surface, causing earthquakes."

"The blow type of earthquake is probably less important. Such a blow might result from the falling in of a great cavern, but probably would cause only a local shiver. A more important cause of a blow might be a slipping of one mass of rock over another with a collision at the end of the slide. Such a blow often follows a break, the two acting together."

Volcanic Explosions Play Part. "Earthquakes in active volcanic regions may often result from explosions of gases far beneath the surface; but it is quite possible that even in the neighborhood of volcanoes the majority of the quakes may arise from sudden breaks in the rocks."

"That the earth's 'crust' is subjected to squeezing and pinching is evident from mountain ranges, which are the portion of the crust that is 'pinched up' as one can pinch up a ridge of skin on his arm. If mountains were ever thrust up at all rapidly the earthquakes at the time must have been terrible. Even now there are certain mountains that, though millions of years old, are still geologically 'young' and are slowly rising. The mountains of Japan fall into this class, and it is their 'growing pains,' so to speak, that cause the almost daily earthquakes in the Japanese archipelago. Now and then the strains accumulate over a considerable period and the break or slide and collision which finally occurs is violent enough to shake down hills, open wide cracks and destroy cities."

IS CHIEF OF BUREAU OF HOME ECONOMICS

Dr. Louise Stanley, recently chosen by Secretary Wallace as chief of the bureau of home economics of the Department of Agriculture, is shown here at her desk shortly after she arrived in Washington to assume her duties. At the time of her appointment she held the position of dean of home economics at the University of Missouri. Doctor Stanley is a native of Nashville, Tenn.

HELD FOR "GAS" CON GAME

German Police Arrest Man Who Victimizes Factory Owner.

Not as old as the "lost pocketbook" trick, but just as effective in separating the unwary from their wealth is the "artificial gasoline" game, according to the German police of Berlin who have arrested Leopold Vitz, alias Baron von Orloff.

Orloff, the police declare, victimized the manager of a Friedrichshafen factory to the tune of millions of marks with his tale of how he could make gasoline out of water. The water "treated" by Orloff, who overcame his dupe with trick photographs showing him in the company of the ex-kaiser, remained water. The marks were converted into wine and a general good time.

FINDS \$1,000 IN "BOOK"

Secondhand Man in London Returns Treasure Trove to Owner.

The widow of the late John Troutbeck, for many years coroner for Westminster, England, had such a surprise when a box, shaped like a book, containing £200 (\$1,000), was returned to her that she fainted. It appears the "book" was among a number which Mrs. Troutbeck sold for £3 (\$15), thinking they were old medical works of her late husband's and of little value. The bookseller on examining them discovered one had a lock and on opening it found a £5 note and 190 £1 notes, which he returned to the widow.

To Dig Out Spanish Tax Dodgers.

The Spanish government is to resort to airplanes in its search for tax dodgers. An aerial survey of the country, in which pictures will be taken, is planned to learn the exact area of all the property held by each landholder.

Fired Into Group of Loafers.

Because he was unable to sleep while a half dozen men loafed in front of his flat in New York city, Joseph Borgabona fired at the group. James Hennessy, thirty-one years old, who lived nearby, was fatally wounded.

Hotel Stenographer

BY ROE FULKERSON

"Did you tell that guy he was handsome?" asked the House Detective, grinning. "He's as homely as a mud fence."

"That's the answer," said the Hotel Stenographer. "All men want to be what they are not."

"It is wasted effort to tell a handsome man he is good looking. I always tell a good looking guy that he is brainy and a homely cuss that he is good looking. Both are sure to agree with you. So many people notice that good looking men are good looking and homely men are brainy, that they think you are smart because you have noticed something the others haven't."

"I make it a rule to pat a bald headed man on the head and tell him he is intellectual. All bald men think every one is dodging them because they are bald and if you pretend to like, they think you are worth while."

"I always tell old men they are wicked kids, and make 'em happy and it does not hurt me any."

"I always tell a young man I think he is dangerous. Nothing pleases him so much as have you think he is a blase man of the world."

"I always tell a little runt that I could cling to him with confidence, and tell a fat man that I love to dance with him. A fat man knows nobody likes to dance with him, just as the little guy knows that women like the big strong kind of men."

"I do not know why, Kelly, but wicked men like to be thought good, and harmless ones like to be thought wicked. They like to be thought the things they are not, so I give 'em the once over and pretend I think they are what I know they are not. It makes them happy and I am a regular good Samaritan, because if you make your customers happy, they are certainly liberal with their tips."

Portugal's National Epic.

The national epic of Portugal is the "Lusiad," written by Luis Vaz de Camoens (1524-1580) and published in 1572, says the Detroit News. The great poem which has been translated into many languages, was begun by Camoens while he was in exile in India and was completed shortly after he was allowed to return to Portugal. Before 1700, 38 editions of the "Lusiad" were printed in Lisbon. Although the "Lusiad" was, as a piece of literature, a tremendous success, it netted its author little financial gain, for, as his epitaph, destroyed in 1775, read, "He lived poor and neglected and so died."

PUMPKIN SHOW REST ROOM

Ladies' and Children are especially invited to use the comfort station and rest room to be maintained during the Pumpkin Show at our place of business. Tables and chairs will be provided and packages will be checked for you free of charge. Clean toilet waiting room in which you can spruce up the children and a nice warm waiting room in which to meet your friends. Our place of business and our employees will be at the service of the public during the Pumpkin Show period.

THE GIRL WHO HID

By AGNES BROGAN

(©, 1923, Western Newspaper Union.)

JOHN CRAVEN looked at the white, almost tragic faces of the two he loved best and passed a hand wearily over his brow. In a busy life he had met with so much disillusionment that he had hoped, earnestly, here in his own home he might not be disappointed. But disappointment had come, and most humilatingly.

That it should be Elaine's little protégé who more than disappointed was a bitter fact. And he, too—how he had counted on the girl! How he had, unconsciously, trusted and loved her. Yes, loved—he admitted this now, in a calm, detached sort of way.

"Fritzie"—the odd little name that seemed part of her endearment—"Fritzie," who had been the song and sunshine of the great, gloomy house from the day that his sister Elaine brought her, so triumphantly, from the mission house in the lower part of the city, where Elaine was interested in social welfare work.

"Fritzie" had not been an occupant of the mission house; she lived near it, Elaine explained, in a shabby old tenement building. But she had taken advantage of certain classes at the mission, and had helped Elaine with her work, too, among the people. When the girl's father died, leaving her alone in the corner room of the tenement, Elaine, in her own sisterless condition, had asked the mission girl to come out to the big house and call herself Elaine's secretary.

And so far "Fritzie" more than repaid. And she, as well as Elaine, had appeared happy in the situation.

"These slum girls are not proper or responsible persons to bring into one's home," Aunt Polly had insisted.

Rollin Danvers moved uncomfortably in his chair. Rollin and his belongings were always causing trouble or confusion, John thought, unreasonably. And this trouble was because of the gay Rollin's diamond ring. It had been given to Elaine as an engagement ring, and when Rollin's affections went flitting—to rest at Bester's door—Elaine had given back the big diamond, leaving her finger in noticeable bareness.

Hester, his sister's guest as well as her rival, wore no ring on her pretty finger; that probably was to come. The tragedy of today lay in the fact that the valuable diamond which Elaine had returned had for several days been missing from its corner on the dressing table assigned to Rollin's use during his stay in the Craven home during the house party which had developed such unfortunate happenings.

After fruitless search and inquiry "Fritzie," the adopted inmate of the very home circle, was proven—and admitted—the thief.

Carrie, the housemaid, had with her own eyes seen "Fritzie" secreting the ring. Still, sadly, John Craven gave the girl one last chance to clear the imputation.

"You need have no fear of punishment, 'Fritzie,'" he said. "Rollin assures us that all he wishes is his property. And you have returned the ring. The matter will be kept among ourselves. Therefore, you may have had some excuse for having the thing in your possession—some explainable reason. You took it because—?" Pleadingly, his eyes begged the girl to answer his question.

Elaine raised her head to look up into the calm face above her own. "I—took it," "Fritzie" answered, after a moment's hesitation—that was all.

During the days which followed, the happy little creature who had come among them so joyously—and had departed so silently—was not to be found. John Craven did try to find her; an aching fear haunted him that in that family denouncement in the library wrong had been done, despite the girl's own confession.

But well was "Fritzie" hidden. Her true name—Elaine helped him—was plain "Mary Hunter"; the other, adopted by the admiring folk of the tenement, had been her father's pet whimsical name for his loved little daughter. Then, when "Fritzie" had been hidden for a year, Elaine, in her new-found happiness of the renewal of her engagement to the carefree Rollin, came one day to her brother to make tearful confession.

"You see, I was so afraid that Rollin intended to give my ring to Hester—though now he tells me he was only trying to make me jealous—that I sent 'Fritzie' to his room to get it. When Carrie saw her, 'Fritzie' was placing it in her own small safety box. She had no idea that she was doing wrong. But I meant to straighten things later—then 'Fritzie' ran away to shield me from humiliation. I do believe. She had an undue sense of gratitude."

Accidentally—or it may have been fate leading—John Craven found himself one day before an old tenement building near the settlement mission. On an unaccustomed shining window he read a name—"Mary Hunter, Medicine Shop."

Yes, it was "Fritzie" who greeted him gravely across the white counter. "My father," she explained, "was doctor to these people all his life—a life purposely devoted to their needs. Before he died it was his wish that I carry on the medicine part of the service, at least. I had but one more year to study when Elaine came and took me to your home. Since then I have finished my year. So I am back with the people who need and trust me."

"I need you, 'Fritzie,'" John Craven humbly pleaded. "I need and trust you as a man needs and trusts the woman who must be his wife."

And so he persuaded her.

Interesting Reflections.

Franklin came of a line of sturdy blacksmiths who lived for two hundred years in England only twelve miles from the manor house of Washington's ancestors. It is interesting to reflect, in the light of subsequent history, how the pink-coated huntsmen of Washington's aristocratic family may have had their horses shod by Franklin's kinsmen.

AUTO LAUNDRY

Turney's Auto Laundry is at 212 West Main street. Call phone 34, Colonial garage. All calls promptly attended to and work satisfactory.

FRANK DENNIS FARM FOR SALE.

177½ acre tract, 6 room frame dwelling, good frame barn with metal roof, two good corn cribs and other outbuildings, well tiled and fenced with four good wells; located two miles west of Five Points on a good pike in Monroe township.

This is an ideal stock farm or it would make a nice country home. We are offering this at \$125 per acre for the next thirty days.

Other Sizes In Proportion.

When you buy a KELLY CORD TIRE you get the long mileage for which Kellys have always been famous. You also get the greatest degree of protection against skidding that has ever been obtainable in any tire.

A good tire deserves a good tube. In fact, without a good tube inside it the best of tires won't yield the service its makers have built into it. Kelly tubes are a real economy. They are made to help tires deliver the mileage for which Kellys have always been noted.

NOECKER-MOTOR COMPANY

"The Firm That Makes Good Its Word."

CIRCLEVILLE,

OHIO.

Out for Business.
Hanging on a strap in a crowded street car to the music of the conductor's sonorous voice at frequent intervals bellowing, "Step forward in the car, please," a negro remarked, "Dat boy sho' mus' be workin' on comishun."—Columbus Dispatch.

Nicknaming the Great.
Robert Burns was known as "Rantin', Rovin' Robin"; Shakespeare as "Gentle Willie"; Doctor Johnson as "Sulky Sam," and the "Great Cham of Literature."

EMPLOYMENT FOR MANY.
Every person in Circleville realizes how badly the city is handicapped by the lack of permanent all-year-around industry.

The Hinde Paper Box company it started here will employ 140 people at the start and more in the near future, paying liberal wages.

Subscribe now and boost this excellent project along.

Friends of Job.
"Job's comforter" is the expression ironically used to denote any person who, under pretense of sympathizing with another's afflictions, attributes them to his misdeeds and thus aggravates his sorrow. The allusion is to Eliphaz, Bildad and Zophar, friends of Job, who visited him in his distress and declared that his misfortunes resulted from his sins and iniquities. "Then Job answered and said, I have heard many such things; miserable comforters are ye all."—Job 16:1-2.

"Keep Your Powder Dry."
The saying, "Keep your powder dry," is attributed to several historic persons. It was probably first used by Oliver Cromwell, says the Detroit News. On one occasion, the story goes, when his "Ironsides" were about to attack the enemy on the opposite side of a river, Cromwell concluded his address to them: "Put your trust in God; but mind to keep your powder dry." Since that time several great soldiers, including Napoleon, have used the words.

Black Knot Most Serious Disease

Must Be Carefully Watched and Controlled by Spraying.

There is a disease of plum trees that bears the very descriptive name of black knot. It is observed on the twigs of plum trees, and sometimes on cherries, where it causes a knot like a swelling that is olive green in color in spring and black in the fall. Where the disease appears on limbs, the swelling may extend up and down the branch for as much as a foot, while on fruiting spurs it may exist as a knot no larger than a grain of wheat.

Caused by Fungus.
Black knot is caused by a fungus that affects the wood, causing it to swell into the rough, deformed places. It is regarded as a serious, destructive disease, and one that must be carefully watched and kept under control. Damson plums are more subject to black knot, and varieties of the triflora group the least liable to suffer. Spores of the fungus are liberated in spring from the galls formed the year before. When infection takes place the knots may be observed in the fall, but they are more conspicuous in the spring. With the beginning of growth in spring the knot swells rapidly and bursts the bark, which at that time may uncover a yellowish surface which rather quickly turns to a velvety dark green color. The knot then is covered with a mass of summer spores, which are carried by the wind to spread the disease. Toward fall the knot turns black and develops a new crop of spores that are not liberated until the following spring. These are called winter spores and differ very much in their origin from the summer spores.

Most Satisfactory Control.
While spraying may be a safeguard against infection, the most satisfactory control of black knot is to prune off and immediately burn the infected twigs and limbs. When this is done in the fall or winter, the source of infection is removed. In doing this pruning, it must be remembered that the tiny, little knots so easy to overlook on the fruit spurs, are capable of keeping up the infection. Watch for the little knots on the twigs, and cut them out. Burn all of the prunings at once, otherwise they will liberate spores just the same as if they had not been cut off.

Important That Horses Receive Liberal Ration

During the working season when horses are performing heavy work, it is very important that they receive a liberal ration of grain and roughage. Opinions differ greatly regarding the amount and kind of feed a horse should receive when performing hard work. Corn and oats, mixed, make a very acceptable grain feed. A good combination of these two feeds is two bushels of oats to one bushel of corn. A general rule that will give good results is to feed about 1 1/4 pounds of grain to every 100 pounds of horse at hard work. One gallon of grain mixture three times a day is about the proper amount for a 1,200-pound horse. Approximately one pound of good quality hay per day per one hundred pounds of live weight is sufficient. The amount of hay to be fed will necessarily vary somewhat with the kind and quality available. Where horses are turned on a night pasture, they should have access to hay at least during the noon hour. Plenty of water is very essential to good success with work horses. They should have access to clean water in the morning, at noon and during the night.

Select Breeding Males as Soon as Practicable

The selection of breeding males for next season should begin as soon as they can be distinguished from the pullets. The Missouri experiment station bred up a great flock of layers in a few years simply by selecting the cockerels that showed first and the pullets that laid first for breeding purposes. If one does not trap-nest it is difficult to select the pullets from large flocks. But a few minutes spent with the cockerels early on a clear morning will readily distinguish the more advanced males. A peeping red comb is the first indication; and a squeaky crow is the second.

The exceptional cockerels of the Leghorns and other lighter breeds will start to crow at about six weeks. The heavier breeds usually take from eight to nine weeks. These early crows should be marked by wing bands or leg bands and given special attention until maturity.

A few minutes spent in observing the males at this age will repay the breeder many times over for his trouble.

Dampness or Draughts in Hen House Cause Roup

Dampness or draughts in the poultry house cause roup. Isolate the sick birds. Remove as much of the accumulations in the nostrils as possible. Rub the head of the sick hen with camphorated grease. A coal tar disinfectant is useful in treating, and especially preventing roup. The success with most roup cures depends on treating the bird with a cold and curing the cold before the devitalized condition of the hen makes a cure impossible.

Qualities That Make for Success.
The successful man is the one who has tried not cried, worked not dodged, shouldered responsibility not evaded it, who has gotten under the burden, not stood off looking on and giving gratuitous advice.

NOW IS TIME TO HELP.

Now that the Hinde Paper Box company has selected the site for their new Container Plant, there is no longer any reason for our people withholding their support from the project. Fibre containers are used here in very large quantities. The city is badly in need of steady employment for its people. Let everyone subscribe as they can afford and help get the good work started.

NOTICE.
There will be a special meeting of the W. H. M. S. in the Methodist church parlor Monday evening at 7 o'clock. All members are urgently requested to be present as a very important matter is to be decided at this meeting. 6octd2.

The Fibre Container industry in Circleville is a logical kind of business to engage in the paper business. It has proven profitable in the Miami Valley at Piqua, Tippicanoe City, Dayton, Franklin, Middletown, Lockland, and Hamilton and Cincinnati where ten thousand people are engaged in it.

DO NOT BE DISCOURAGED.

If others have failed to repair your broken castings. Remember that the Circleville Welding Co., established over four years ago specializes in welding. If your valve goes thru your Fordston tractor head it can be made as good as new at a saving of \$7. Other work in proportion.

THE WONDER OF THE AGE

THE HOT BLAST
AIR TIGHT

FLORENCE

NO SMOKE! NO SOOT! NO DIRT! NO CLINKERS!
EVERYTHING IS CONSUMED.

At the end of the season's use with soft coal, there will be no soot in the pipe or flue

The Zenith of Stove Perfection

The only jointless leg bottom and base with full radiation and large ash pan that is on the market or has ever been made in the history of the stove industry.

The jointless leg bottom and base makes the stove air-tight below the grate, which is the only true fire keeping principle.

It will be as good a fire keeper twenty years hence as it is today.

The Hot Blast Air-Tight Florence will heat twice the space that can be heated by any other stove on earth at one-half the cost.

The only perfect floor heater that is or has ever been made.

All features are patented and no stove manufacturer, dealer or user can copy or use same until

the expiration of the patent without incurring liability for an action for damages.

THE HOT BLAST AIR-TIGHT FLORENCE burns soft coal or slack and all the smoke and gases. No filling up of the stove, pipe or flue with soot. No dirt inside or outside the house. It will burn hard coal and all the gases which escape from the hard coal base burner. It will burn wood and sawdust, wet or dry. It will produce one-half less ashes than any other stove on earth with any kind of fuel and leave no clinkers or half consumed fuel.

TED SAWYER

Plays on Ohio University Football

Team—Meet St. Xavier Next Week.

Ted Sawyer, of Circleville, has made the squad on the Ohio university football team and last Saturday made the trip to Oberlin college where Ohio was very 'unfortunate' to lose six to nothing. Sawyer plays an end position and is giving both lettermen on the flanks a fast run to hold their positions.

Ohio started her season with 14 letter men but due to the lack of quarterback has been rather slow in getting started. The coaches here have remedied the situation and the Green and White from now on will be an eleven to be feared by every team it is to meet during the remainder of the season. Ohio plays St. Xavier, of Cincinnati, at the Queen City this week.

AUTHOR HONORED BY NATIVES

Samoans Ordered Not to Fire Gun
Within Earshot of Robert Louis
Stevenson's Grave.

James Chalmers, English Papuan missionary, who was killed and eaten by cannibals at Goaribari, met Robert Louis Stevenson on a Pacific steamboat when the novelist was fleeing to Samoa to escape death from tuberculosis. After meeting Chalmers, Stevenson was always an out-and-out defender of foreign missions. "Perhaps that masterpiece of philippics that Stevenson wrote to smash the traducers of Father Damien was inspired by his chance meeting with James Chalmers," writes Arthur Porritt, in "The Best I Remember."

All the time he was in Samoa Stevenson was the friend of the missionaries, and he took their view as to the proper treatment of the natives.

Now that he is dead the Samoan natives respect Stevenson's memory by a beautiful regulation. "By order of the chiefs no native must discharge a gun within earshot of Vailima," says Mr. Porritt, "lest the birds that sing around poor R. L. S.'s lonely grave might be frightened and suspend their requiem."—Detroit News.

The Seven Sleepers.

Seven noble youths of Ephesus, who, according to an early Christian legend first related by Gregory of Tours, fled from the city, during a persecution under the Emperor Decius (249-251 A. D.), and took refuge in a cave on Mount Celion. There they were discovered by their pursuers, who walled up the entrance in order to starve them to death; but, owing to a remarkable interposition in their behalf they were caused to fall into a deep sleep, and were thus miraculously preserved for nearly two hundred years. They died soon after awakening, and their bodies were transferred to Marseilles, France, in a stone sarcophagus, which is still shown to visitors to the church of St. Victor, in that city. According to Gregory, the names of the "seven sleepers" were Constantine, Dionysius, John, Maximian, Malchus, Martinian or Marcian, and Serapion. A festival in their honor is celebrated in the Roman Catholic church July 27. The legend of the "seven sleepers" is widely current in the East. It is of Syrian origin, and occurs in the Koran.

New Kind of Plow.

Despite the development of most farm machinery, the plow has changed little in more than 3,000 years. In primitive times plows were drawn by man power or oxen, today they are efficiently operated by tractor. But the actual shape of the plow and the method of turning the furrows in the soil is much the same as in primitive times.

A unique farming tool has been invented in France which attacks the problem in a new way. The plow is replaced by a number of metal fingers which dig deep into the earth, break it up and prepare it for planting, all in one operation. The labor of plowing and cultivating is thus done quickly and efficiently. The new device seems to work equally well in hard, dry or soft ground and promises an important saving of labor for the farmers, according to accounts.

Reason Why a Top Spins.

Every one who has ever whirled a string to which a stone is tied must have noticed the strong "pull" as the stone tried to get away. Every part of a spinning top is trying to fly away from the center. As each particle of the top has an equal pull, none of them can upset the balance of the others. So long as this force is strong enough—that is, so long as the spin lasts—it counteracts the ordinary power of gravity, which has to confine itself to the peg of the top, the only point actually touching the earth.

When the top slows down the centrifugal force relaxes, gravity comes into its own again—and the top falls over.—Scientific American.

Much in Little.

FISH CLIMB TREE

Anabas Scandens Have Third
for Palm Wine.

Certain Kind of Perch Performs Remarkable Feat—Has Lungs as Well as Gills.

Several hundred years ago some European travelers returning from a visit to India told a fish story rivaling some of the animal fables invented by Baron Munchausen. They affirmed that they had seen, or at least heard of, a fish which apparently feeling the need of a bit of stimulant now and then, emerges from the water near a convenient coconut tree and then climbs the latter to have a drink of palm wine.

The learned men of the day scoffed at the absurdity of this nature tale, but about the beginning of the Eighteenth century the story was repeated, with some modifications, to be sure, by a more reliable authority.

A certain Danish lieutenant, named Daldorf, made a formal report to the newly-founded Natural History Society of London, named in honor of the famous Swedish naturalist, Linnaeus, that he had really seen in the waters off the coast of the East Indian city of Tranquabar a fish which left the water at intervals and actually climbed the stem of a palm tree. It accomplished this remarkable feat by attaching itself to the trunk of the tree, by means of the ends of the extended gill covers and at the same time pressing the tail fins and anal fins against the bark, thus managing by suitable motion of its body to hang on and climb higher and higher.

The Danish sailor did not reveal where it was seen, but said when captured it showed no distress at being out of water and gambled happily in the sand for hour after hour.

The assembled naturalists were unconvinced. They were quite sure that fish are able to breathe only by gills, and that when these are dry, as they soon must be when a fish is taken out of water, the fish inevitably quickly dies.

Strange as it may seem, however, the story was true. There is a climbing fish which can live out of water for quite a long time. This is the climbing perch, Anabas Scandens. To be sure it climbs only occasionally and then upon palm trunks, which ascend not vertically but at a convenient slant. It does make a practice, however, of climbing out of the water and spending hours in the dry grass on the bank. This fish has lungs as well as gills, which accounts for its unusual powers.—Review of Reviews.

Shrine Yields Heathen Relics.

Relics, estimated to be about 4,000 years old, have been found by enthusiasts in a tomb and shrine of heathen worship built during the Stone Age. Located in the southern part of Sweden, it lay buried beneath ten different strata of earth. Constructed of large rock slabs, it has a central chamber, ten by five feet. Around this is a circular pavement, from which radiate a number of curious walks marked by stones. A considerable quantity of human and animal bones, together with flint daggers and spearheads, were unearthed. Also, there were about 7,000 fragments of ornamented vases, which had been thickly strewn outside the tomb. The shattering of these containers probably took place in connection with heathen religious ceremonies.—Popular Mechanics.

She Had Company.

Thompson was coming home from a dance, when all of a sudden he collided with some one who was running wildly in the opposite direction. When the two had sorted themselves out he saw that the other was his friend, Wilks.

"Why, Wilks!" he exclaimed. "Where are you going in all this hurry?"

"I—I am going for the police," replied his friend.

"For the police! What is the matter?"

"We've got burglars in our house."

"But surely you haven't left your wife alone?"

"Oh, no! She's holding the burglar!"

Last Words of "Bob" Ingersoll.

Robert G. Ingersoll, the agnostic, died suddenly and did not talk about religion and the after-life just before his death, as popularly supposed. On the day he died he suffered an attack of acute indigestion and lay down to rest. About an hour later he put on his shoes. Noticing that he looked pale, his wife offered to have his dinner brought to him. But he refused, saying, "Oh, no, I don't want to trouble you." Then Mrs. Ingersoll offered to give him some medicine, but again he refused with a smile, saying, "I'm better now." Those were his last words. He sank down in his chair, dead.—Detroit News.

Honesty in Shoes.

"No," said the old man sternly. "I will not do it. Never have I sold anything by false representations, and I will not begin now."

For a moment he was silent, and the clerk who stood before him could see that the better nature of his employer was fighting strongly for the right.

"No," said the old man again. "I will not do it. It is an inferior grade of shoe, and I will never pass it off as anything better. Mark it A Shoe for a Queen, and put it in the window. A queen does not have to do such walking."

DERBY DUKES

Defeated by Robtown Baseball Team by
Score of 6 to 0.

The Robtown boys showed the Derby Dukes how to play real ball Sunday and defeated them 6 to 0. Only four of the Derby boys were able to get on base and two of them got out trying to steal second. It's no use trying to steal with Neff on second and Tharp doing the catching was what they said. Dewey pitched a real brand of ball and allowed but one hit and struckout thirteen. Robtown boys collected thirteen hits off Hunter, including three base hits, Neff 2 and Hill 1, and he only struckout two. Robtown and Derby will play the third game of their series at Harrisburg next Sunday, both teams agreeing to play on neutral grounds.

FLINT PROPERTY SOLD

CONGRESS MUST PROVIDE MEANS

Mellon Anticipates Enactment of Bonus Legislation.

REVIEWS FINANCIAL SITUATION

Secretary of Treasury Declares That Wall Street Is Overdoing Pessimism and That There Are Good Conditions Everywhere in the Country. Anxiety About Railroad Legislation Unwarranted, He Says.

Washington, Oct. 9.—Secretary of the Treasury Mellon indicated the bonus bill certain to be introduced in the next congress must also provide the means for raising the required money to secure his approval.

This was brought out in a review of the financial situation in which these points were stressed: First, that Wall street is overdoing pessimism; second, that there are good conditions everywhere in the United States; third, there is undue apprehension about the situation in Europe, and fourth, there is unwarranted anxiety about railroad legislation and the strength so-called radicals will sway in congress.

This element of uncertainty, it was learned, already has been studied by the cabinet, and the administration policies are being shaped to meet the situation.

Secretary Mellon believes, it was stated, that the soldier bonus measure should be accompanied by some acceptable plan of taxation to raise the required revenue. This, it was explained, must be a method that will not interfere with the present hope of reducing taxes that are considered confiscatory of the higher incomes. The savings now being effected, amounting to hundreds of millions, it was added, had been intended to apply to reduction of taxation.

It is this general atmosphere of uncertainty that is responsible for what the secretary considered unwarranted pessimism in Wall street and business circles in general. It was stated that he believes conditions throughout the United States to be sound in every particular and in no way to reflect the situation as reviewed in financial circles. It was added that reports to him show no unemployment or depression in any of the great industrial activities. He believes, however, that big business is unduly alarmed over other causes. He feels that while the situation in Europe is admittedly bad, particularly in Germany, that this element is not of sufficient force to affect the unusually sound conditions in this country.

The bonus, too, is a factor in this. It was pointed out, but as soon as a definite policy is outlined and business knows what to expect, this will be offset.

In the opinion of the secretary the real cause for anxiety is the number of what he terms "radicals" who are coming into congress and what they will do to the railroads and business in general. The proposal to compel consolidation of the railroads and bring about sweeping reduction in freight rates are causing the most anxiety in his opinion.

WOULD TRADE WITH SOVIET

Congressional Commission Returning to America From Russia.

London, Oct. 9.—Ambassador Harvey was present at Waterloo station to bid bon voyage to the unofficial congressional commission returning to America from Russia. Senators King and Ladd expressed themselves in enthusiastic terms regarding the results of their 90,000 mile tour of Russia. Every day during the voyage home they and their associates will confer for two hours completing their report. Although none of the party would consent to be quoted until after the publication of their report it can be stated authoritatively that they are unanimously in favor of immediate resumption of trade relations with Russia. Senator King, who was intensely prejudiced against Trotsky, now recognizes the Russian leader as "an unusually able man."

Aviator Killed.

St. Paul, Oct. 9.—Harry J. Quinn, St. Paul aviator, was killed near here when the wings of a new monoplane he was testing dropped off at an altitude of about 500 feet.

Refused Citizenship Papers.

Newark, O., Oct. 9.—More than half a dozen foreigners were refused citizenship papers by Judge C. N. Moore because they had been convicted of liquor law violations.

C. P. VANCE

Member of Commission to Survey Philippine Rubber Situation.

WOULD END WAR

Lloyd George Urges Unity of Action Among All Nations.

Montreal, Oct. 8.—David Lloyd George's message to Canada, delivered before an audience of 7,000 here, was a plea for unity of action among all races of the world to end war. Describing the horrors of the late conflict, and pointing to his own whitened locks as an example of what war does to men who have a part in it, the former British premier declared it is the destiny of nations to prevent war in the future. "No man can tell now what that war will mean to the human race," he said. "The future is in the fog rising from the war, and I can not tell, no man can tell, what is going to happen. But this I do know that the war altered the destiny of mankind for generations, aye for centuries to come."

WOULD SUPPORT LEAGUE OF NATIONS

Viscount Grey Sees Indications of a Future War.

London, Oct. 9.—Viscount Grey declares that the Italo-Greek episode has thrown a searching light on the state of Europe and says that Europe is drifting towards a future war unless the league of nations is supported.

"The only thing which can prevent the catastrophe of another great European war is that there should be in every case a genuine attempt to settle disputes between nations by the just decision of an impartial authority before resort is had to force," says Lord Grey.

"Europe has drifted helplessly but perceptibly towards future war. The one thing which might have averted this was the close agreement and confident co-operation between France and Britain. The sinister course of recent events was due to this want of co-operation.

"Recent events have shown with horrid clearness that Europe is sliding slowly towards an abyss. Do we realize how far down the slope we have already gone? It is essential that representatives of Britain should be clear whether they are united upon a policy of upholding the covenant of the league. Another crisis such as the Italian-Greek controversy may bring us all to the final parting of the ways. Future liberties of Europe depend upon regulating disputes between nations by justice and law, maintaining the sanctity of treaties."

War Hero at White House.

Washington, Oct. 9.—General Josef Haller, Polish war hero, who is to be the guest of the American Legion at its San Francisco convention, was presented to President Coolidge, called on General Pershing and then, with members of his staff, went to Arlington to lay a wreath in the name of Poland on the tomb of the unknown soldier. The general left today for San Francisco.

Haul Made by Bank Bandits.

Oakland, Cal., Oct. 9.—Bandits held up employees of the West Oakland branch of the Oakland Savings bank and escaped with \$11,000.

Diamond Salesman Robbed.

Chicago, Oct. 9.—J. Schoren of New York, a diamond salesman, reported to the police here that he had been slugged and robbed of a satchel containing diamonds valued at \$80,000.

MAY SUPPRESS RUM RUNNING

Britain Expected to Co-operate With United States.

ACTION LIKELY AT EARLY DATE

Some Move to Deal Effectively With the Situation Created by Liquor Laden Vessels of British Registry Hovering Off the American Coast May Be Made Soon by the London Government.

Washington, Oct. 9.—State department officials wait hopefully for news from London indicating that Great Britain would co-operate with the United States in suppressing rum running under the British flag off American shores.

The belief prevails here that, following the imperial conference in London, the British government will take some action to deal effectively with the situation created by liquor laden vessels of British registry hovering off the coast of the United States. Secretary of State Hughes and Henry G. Chilton, British charge d'affaires in the absence of Ambassador Geddes, have held frequent conferences on the subject at the state department.

Prior to the meeting of the imperial conference, the department sent to Ambassador Harvey in London a complete file of material dealing with the problem created by the hovering ships off the American coast. Colonel Harvey delivered the file to the British foreign office, which had it ready for submission to the prime ministers attending the imperial conference.

No official word has been received here as to the attitude of the conference toward the American proposal for a 12-mile search and seizure privilege in order to stop rum running. News dispatches, however, are regarded as indicating that the conference favors some action to stop the misuse of the British flag in violating American law.

Observers here do not regard as insuperable the objections which were raised by Great Britain to the Hughes plan for dealing with the problem. Special agreements for the 12-mile privilege in order to handle a specific situation, it is pointed out, have been made before, and operate to strengthen rather than to weaken the standing of the traditional three-mile limit guarded so zealously by the British admiralty.

The United States in proposing the 12-mile modification for dealing with rum running does not wish to impair the accepted three-mile limit of territorial jurisdiction. Once the American viewpoint is thoroughly understood abroad, it is felt, Great Britain will be willing to join with the United States in effective measures to stop the smugglers who use the British flag as a shield.

SPEEDY SHIPS NEEDED

Uncle Sam Has Only One That Can Outrun a Rum Smuggler.

Washington, Oct. 9.—Extension of the area within which rum pirates may be captured will be of little avail unless speedy ships are provided for the purpose, it was said at the treasury. "We have only one ship that can outrun a rum runner," said Secretary of the Treasury Mellon. "Our others are easily outdistanced and outmaneuvered. We must be provided with faster craft." The secretary pointed out that extending the danger zone for smugglers 12 miles would, of course, make it more difficult for them to communicate with the shore, but that it would not necessarily make it easier for the slow moving "dry navy" to overhaul those hovering outside.

Treasury officials will go into conference with the Canadian government on Nov. 5 in an effort to stop rum smuggling across the border, it was announced.

Bill Held Boon to Cuba.

Havana, Oct. 9.—President Zayas will sign the modified Tarafa bill. He takes the attitude that the bill is really a boon to the republic of Cuba; that antagonism against the bill has been brought about by abortive interpretations. The bill provides for unification of practically all Cuban railway systems and calls for the closing of many seaports of entry. The bill has met with opposition of American sugar interests, several protests having been filed with the American state department.

NEIL MERTON JUDD

Resumes Exploration of Ruins in Chaco Canyon, New Mexico.

DOINGS IN OHIO

Klan Question Raised.

St. Clairsville, O., Oct. 9.—For the first time in the history of Belmont county judicial procedure, jurors have been questioned regarding their possible affiliation with the Ku Klux Klan. In the case of Julia Tallarovich of Maynard, O., against the Pursglove-Maher company for \$4,000 damages, alleged due because the company diverted water onto her land, the counsel for the woman asked whether any jurors were Ku Kluxers. All said no.

Newspaper Women to Meet.

Dayton, O., Oct. 9.—The Ohio Newspaper Women's association will hold its annual convention in Cincinnati in November, tentative dates, Nov. 16, 17 and 18, having been set at a meeting of the board of directors. The program as outlined will include a number of prominent editors and women journalists in the state as well as speakers of international importance.

Donahay's Declaration.

Columbus, Oct. 9.—Governor Donahay will not be a candidate for delegate-at-large to the Democratic national convention next year, he said. "I will go to the convention if elected as a delegate," said Donahay, "but I do not intend to seek election. I am kept too busy with state affairs to bother voluntarily with national politics."

Victim Succumbs.

Zanesville, O., Oct. 9.—Dr. Lav G. Burroughs of Collingville, Ill., died here of injuries received in an auto collision near this city. Harry J. Kinney of Zanesville received a fractured skull in the accident, and Mrs. Burroughs, Mrs. Kinney and G. S. Ford, also of Zanesville, were bruised and cut.

Arms Cache Uncovered.

Springfield, O., Oct. 9.—Acting upon information supplied by Mrs. Jean Foley, held in Darke county jail, Greenville, on a charge of bank robbery, Darke county officials uncovered a cache of rifles, revolvers, ammunition, nitroglycerin and safe blowing equipment buried on the William Thomas farm, east of Springfield.

Carry Away Safe.

Cincinnati, Oct. 9.—A gang of burglars entered the office of the Toad Stool inn in Avondale and carried away the safe, which weighed half a ton and contained \$2,300 in cash, besides a number of valuable papers, the personal property of A. J. Marshall, proprietor of the inn.

Miner Killed.

New Philadelphia, O., Oct. 9.—Albert J. Shidaker, 28, local miner, was killed, when one of the front wheels of his automobile was broken off, caused by hitting a sand pile in the road. Four other occupants of the car received minor injuries.

Two Auto Victims.

Cleveland, Oct. 9.—Mrs. Mary Nichols, 62, died from injuries received when he was run down by an auto. Emil Berardi, 24, was killed here when a train hit his auto at a crossing.

Probers Submit Report.

Paris, Oct. 9.—General Cornelius Vanderbilt and Martin W. Littleton returned from Belleau cemetery. They made public their report on the condition of the graves of American soldiers and the upkeep of the cemetery. The report declares that no blame rests on the cemetery authorities for the condition of the cemetery owing to the fact of the difficult work of transplanting the graves made necessary by the recent wholesale removals.

WALTON LIKELY TO RESIGN

Will Deliver Message Thursday to Oklahoma Legislature.

TWO INQUIRIES IN PROSPECT

Federal Grand Jury Investigation of Governor's Acts and the Workings of the Ku Klux Klan Hinted at In Judge Williams Charge—General Assembly Also to Probe Walton's Recent Doings.

Oklahoma City, Oct. 9.—Oklahoma is seething with intense bitterness as plans go forward for the extraordinary session of the legislature called by Governor J. C. Walton for Thursday.

Feeling is even more intense than some 10 days ago, when the legislature attempted to meet on its own call in defiance of the governor and his militia. There are persistent rumors that the governor will resign, all scornfully denied by his close friends.

A sweeping federal grand jury investigation of the governor's acts and the workings of the Ku Klux Klan is also in prospect. Even the governor's voluntary retirement, which is possible and even expected, would have no effect upon the legislative probe. According to one report the governor will go before the legislature, deliver his message, explain his gubernatorial acts, proclaim his attitude toward the Klan, demand its dissolution and then quit.

The legislature will caucus Wednesday night preparatory to assembling Thursday morning. If W. B. McBee can be prevailed upon to accept he will be elected speaker, in place of Murray Gibbons, pro-Walton, presiding officer at present.

The governor's special session proclamation was filed formally last evening. Immediately urgent messages were sent out by McBee's committee for all members to be in their seats at the time fixed.

The hint of federal investigation came from Tulsa, where Federal Judge R. L. Williams, former governor of Oklahoma, delivered his charge to the grand jury. In his charge he said: "Citizens are guaranteed the right of trial by jury and representation by counsel. Persons and property are to be protected from unlawful search or seizure. No court, no governor, no officers, no congress or legislature, can take these rights away. If no governor or legislature can do it, it follows that no private citizen or assembly of citizens can do it. Any such assembly is nothing but a mob."

The suggestion that "both sides" be investigated was contained in this paragraph of the charge: "You stand in the presence of your country and the God of hosts in making these investigations, and if there ever was a time when a grand jury should consider the law carefully, it is at a time as this in Oklahoma, where on one side the executive has trampled it under foot and on the other the mob has trampled it under foot."

Judge Williams last Thursday organized election officials in his home town, when he and others were denied the privilege of votes and cast the ballots in an improvised ballot box.

CONDEMNNS HOME BREW

Health Officer Says Consumers Are Slowly Committing Suicide.

Chicago, Oct. 9.—Consumers of home brew are slowly committing suicide, according to Herman N. Bundesen, Chicago health commissioner. Bundesen has just completed laboratory tests of 2,000 samples of various home brews and beers. All of them contained poison, formed by improper fermentation and lack of understanding of the science of brewing. Some of the things he found were formic acid, aldehyde, acetic acid, lead copper, arsenic and salicylic acid. Drinking such poor booze, Bundesen declared, causes ulcer of the stomach, catarrh, puffiness under the eyelids, numbness, skin eruptions, paralysis, digestive disturbances, destruction of kidneys and general ruin of health.

Crap Game Raided.

Akron, O., Oct. 9.—Four men were arrested here following a raid on a downtown "crap" game in which the stakes ran well into the thousands of dollars. One man had \$6,000 in his purse.

THE WEATHER.

Ohio—Wednesday: Fair; little change in temperature.

SEVERAL OBJECTIONABLE

Democratic Senators to Fight Confirmation of Recess Appointments.

Washington, Oct. 9.—Democratic senators are laying their lines to fight confirmation of a number of recess appointments made by the late President Harding after congress adjourned last March. When the new congress convenes in December there will be a long list of these appointments, representing nearly every branch of the government and including many high administrative places, for President Coolidge to send to the senate, unless he sees fit to exercise his prerogative and substitute other names for the incumbents. Democratic senators are proceeding on the assumption that President Coolidge will stick by the Harding appointees and are preparing for a finish fight on some that are particularly objectionable. The outstanding cases are Walter L. Cohen as collector of the port at New Orleans and Joseph W. Tolbert as United States marshal for the western district of South Carolina. Both were rejected by the last senate.

Gas Case to Be Reviewed.

Washington, Oct. 9.—The request of West Virginia for a review of the cases brought against it by Ohio and Pennsylvania in which was involved its right to place restriction upon the quantity of natural gas sent into adjoining states was granted by the supreme court and the case set for hearing Nov. 19. In a decision last June the court held that the gas had entered interstate commerce and that under federal constitution West Virginia could not place any restrictions upon its exportation to other states.

"MONEY MADNESS"

New Disease Spreading in Germany as the Mark Goes Toward Zero.

Berlin, Oct. 9.—"Money madness," a new disease, is spreading in Germany as the German mark and the Russian ruble are racing neck and neck towards absolute zero. Doctors report that the strain of constantly computing ordinary business transactions in astronomical figures is causing frequent mental breakdowns. Most purchases, even the price of meats, are computed in billions and stocks sometimes jump billions of per cent in a day. A symptom of the disease is a mad desire to fling money away. Papers report daily incidents of people throwing money in the street by the basketful, often causing embryo riots. More aggravated cases of this mania have led to a number of suicides.

Radical Leader Unseated.

Portland, Ore., Oct. 9.—By a vote of 27,838 to 130 of the 28,588 votes on the delegates to the convention, William F. Dunne, editor of the Butte, Mont., Bulletin, radical leader and member of the workers party, was unseated as a delegate to the convention of the American Federation of Labor. Dunne is one of the defendants in the Michigan syndicalist cases awaiting trial in Berrien county, Mich., and is a follower of William Z. Foster, radical.

MARKET QUOTATIONS

CHICAGO, Oct. 9.
Cattle—Top steers, \$12 50; bulk of sales, \$8 50@10 50; stockers and feeders, \$5 75@7 50; calves, \$8 75@12.

TOLEDO, Oct. 9.
Wheat, \$1 14@1 15; corn, \$1 04@1 05; oats, 48 1/2@49 1/2c; cloverseed, 31 1/2@32.

The Uninformed.

At the height of the Derby fever in London two men were arguing on a literary subject on the top of an omnibus: "Well," said one, "John puts 'Bleak House' first and 'Martin Chuzzlewit' second." A hoarse voice interrupted from the seat behind. "Gentlemen," it said, "I don't know your pal John, but you're bein' had. There's no such horses runnin'."

Flowers as Timekeepers.

The dandelions open in the morning and close in the evening at the same time every day. The hawk weed and goat's beard are quite as regular. If the right subjects were planted it would, no doubt, be possible to have a bed of flowers that would tell the exact hour of the day from sunrise to sunset.

HOW MUCH WATER

Has Flowed Under the Bridge Since You First Might Have Begun to Save?

How much of your river of life has flowed by and left nothing but remembrance behind? When it goes over the mill wheel of a savings account it steadily creates wealth for you as it passes by. Interest is compounded semi-annually.

CROOKS FOOL YOU WITH DISGUISES

Clever Criminals Alter Their Appearance Before the Crime.

IDENTIFYING MARKS ARE FAKED

Every experienced detective knows that as a general rule the amateur crook commits a crime and then attempts to effect a disguise, while the professional disguises himself and then commits a crime. The novice tries to escape while in disguise, while the professional relies upon his natural appearance to escape detection and arrest.

Years of experience with criminals have taught the police throughout the world to be suspicious of unusual facts when personal descriptions of criminals are presented for their information and guidance. Crooks know if they can make it appear that they have a long gash on the right cheek and can expose that gash frequently, that that mark will make such an impression that when a description is prepared later nothing else can be remembered. And, of course, after the crime, the crook removes the "gash."

Years ago when beards were common, false whiskers and false mustaches were used a great deal by criminals. Today tight-fitting wigs have taken their place. A criminal is described as having coal-black hair. The removal of his wig reveals him a blond.

Crooks also know that nine persons out of ten cannot describe either a man or woman. If any details are remembered they are usually details about dress, which mean nothing.

Unable to Agree.

Prof. Hugo Munsterberg, the famous Harvard professor, who was one of the profoundest students of criminology this or any other country ever produced, conducted numerous experiments to prove that most men and women can't report accurately what they see. One of his favorite experiments was to have two men unexpectedly stage a mock fight in his classroom. After the men had been ejected from the room and all was quiet, Doctor Munsterberg would ask his students to describe what they had seen. And the conflicting details that were submitted were startling.

Criminals have been known to disguise their walk. Policemen particularly know that a man's walk is an easy method of identification. Criminals have been known to go into banks and stores, with a limp and with some definite mannerism which would identify that person personally if the method of walking was real. The unusual walk immediately attracts attention and other facts are ignored.

One of the keenest students of criminology in this country, Charles R. Robb tells of a forger who was always described as a very full-faced, fat man. He was frequently shadowed, only to be lost in buildings. Detectives would wait on the outside for the return of the fat man, little knowing that the thin-faced, thin man who left while they were watching was the man they wanted. It developed that this man wore a rubber poncho beneath his overcoat and that with a hand pump he blew this up, giving him the appearance of an enormously fat man. With the aid of cotton he made his face look full, also, he stuffed cotton in his mouth over his cheek bones. A study of the rogues' gallery pictures of this man is very amazing.

Crooks have been known to pretend that they had clubfoot, stiffened arm, deformed hand, and, of course, these details caught the eye of the persons they came in contact with and other details which should have been remembered escaped them.

Marks Faked.

The average person will immediately notice a birthmark, a wart, or tattooing on one's face, neck or hands. Crooks know this and have succeeded in throwing police off their trail by faking such marks.

A well-known railway pickpocket in England, at the moment of effecting a big theft, made on his cheek a large mole with carpenter's glue mixed with grated leather.

Criminals who have had real identifying scars have been known to commit crimes and then to have gone to dishonest so-called beauty doctors, and had their scars removed. This resulted in certain studies being made in France, which led to the discovery that if the skin is beaten with the palm of the hand gently but firmly for a few minutes any old scars will be revealed. The old scar will appear white and in its original shape, while the skin around the scar will be red.

Whenever a criminal commits a crime he usually watches the papers for a description of himself. He notes every detail and then proceeds to alter himself so that the description will not fit. It has been long debated whether it was wise to publish descriptions of criminals because such descriptions always fall into the hands of the criminals themselves.

Large Telescope for Argentina.

A 60-inch reflector has recently been completed by a Cleveland optical works for the Argentine National observatory. The mechanical equipment is unusually accurate and the entire instrument is a credit to the optical skill of a great firm of builders of machine tools.—Scientific American.

BEAVER A REAL ENGINEER

Wonderful Work of Tribe of Small Animals in Yellowstone National Park.

A healthy increase in the beaver population of the Yellowstone National park is reported from many quarters. Some of the famous old beaver ponds and lodges have been abandoned, but there is new activity in many areas.

A scientific study of beaver begun in former years was continued this year by Edward R. Warren, naturalist of the Roosevelt wild life forest experiment station at Syracuse, N. Y. He has spent the entire summer in the northeastern section of the park, where beaver are especially active. The beaver in that region are as numerous as natural conditions will permit, and a surplus of population has compelled many of the animals to seek new feeding grounds and build new dams and lodges.

The beaver makes his habitat in proximity to aspen groves. In the vicinity of Camp Roosevelt large groves of these trees have been cut down, the bark used as food and the logs for construction purposes. The beaver has been obliged to abandon a famous series of beaver ponds in Lost creek beside the Cooke City road.

The increasing beaver population is attributed in part to the reduction in number of coyotes and wolves within the park. These predatory animals, great foes of the antelope and baby elk, have been systematically hunted by rangers during recent winters. Mr. Warren suggests a possibility that the beaver population may eventually reach a point where reduction may become necessary. This could be accomplished by trapping beaver families and sending them to other national parks or regions where the restoration of this valuable American animal is being attempted.

Marvelous engineering work of the beaver is described by Mr. Warren in a publication, "The Life of the Yellowstone Beaver." Beaver use four different types of construction, he writes—dams, lodges, burrows and canals. He regards the canal as in many respects the highest engineering achievement. "To deliberately plan and dig a channel in which to float logs to a pond, and not only that, but to build dams in this channel to hold water to a desired level, is an intelligent act." On Tower creek Mr. Warren found two such canals, one ninety feet long and another 150 feet.

Books by the Million.

Have you ever pondered how many books there are in existence? On the average, 200,000 volumes are published each year throughout the world and, as 8,500,000 books appeared last century, one can obtain a fairly good idea of the size of the world's book shop.

Adding together the number of volumes published in each century since printing was invented, the astonishing total of 60,000,000 is reached. The amount of energy, time, paper and printer's ink which have gone to produce all these books is incalculable.

A great many of these publications are each worth more than \$5,000, and the total value of the world's book stocks must run into many millions. Stacked together, they would form a fair-sized mountain, the ascent of which would take several hours.

The three largest libraries in the world are the British Museum library, which has 4,000,000 volumes; the Bibliotheque Nationale at Paris, which has 3,000,000, and the Library of Congress at Washington, with just 500,000 less. Thus, among them alone these three great institutions possess 9,500,000 books of all kinds.—London Tit-Bits.

Clock Mending a King's Hobby.

Few kings have had more power or a stranger hobby than Charles V, emperor of Germany and king of Spain in the sixteenth century, and the greatest potentate of his time. Finally the king business palled on him to such a degree that he determined to give up the world and retire to a monastery.

According to a story, a clock in his cell failed to keep proper time. With his own hands he set himself to make the clock keep time. Then he looked around the monastery and laid hold of another timepiece that was out of tune.

If one may believe Charles' chronicler, he made out well with the two clocks. Then the idea occurred to him of bringing in all the clocks in the neighborhood that needed mending, oiling and refurbishing. Work benches were provided. Charles donned an apron and toiled early and late upon his clocks. Toward the end he had more than 100 clocks of all sorts, and it was the passion of his last days to make the whole lot keep the same time.—Detroit News.

Sending by "Bottle Post."

A bottle from the hydrographic office, containing a slip of paper on which was recorded the fact that it was dropped from a ship in latitude 12 degrees 7 minutes north, longitude 76 degrees 53 minutes west, which is in the Caribbean sea about 300 miles northeast of Cristobal, was recovered at Galeta Island, seven miles northeast of Cristobal. It had traveled 290 miles in 12 days, about one mile an hour.

And Women Are So Constant.

Pauline—Men are the most changeable creatures on earth.

Josephine—What makes you think that, dear?

"Well, only a fortnight ago I was desperately in love with Dick, and now I cannot stand him"—London Tit-Bits.

AERIE OF EAGLES

Congressman Reilly Will Make Address in Memorial Hall Tuesday Evening.

The Hon. Thomas L. Reilly, of New Haven, Connecticut, a former member of congress, from that state, will be in Circleville on next Tuesday and deliver an address in the evening at Memorial hall.

THOMAS L. REILLY.

This meeting is given under the auspices of Circleville Aerie of Eagles and Congressman Reilly has a message to deliver which will be of interest to every resident of Circleville. The meeting will be of a public nature and all are invited to be present and hear this excellent address.

In addition to the address by Mr. Reilly a pleasing musical program is being arranged by the local committee.

FARMS FOR SALE.

88 acre tract with 7 room frame dwelling, good barn and other outbuildings, well tiled and fenced, good orchard, located just off Lancaster pike close to centralized school. Party purchasing this place has the privilege of sowing wheat this fall with possession given March 1, 1924 and the price is right.

Walling farm consisting of 104 acre tract with 8 room frame dwelling, 3 good barns, 2 room pump station, scales, silo, cement corn crib, large cattle barn and windpump, well drained and fenced, with 12 acres of growing alfalfa, located on paved pike just out of the corporation with lowest tax rate in the county. Within 100 yards of traction station, good market and school. If sold in a few days possession can be given at once. We regard this a fine location for a home.

CIRCLE REALTY CO.

Ford
THE UNIVERSAL CAR

New Touring Car

Looking at the new touring car from the side, you are at once favorably impressed with the effect of longer, more graceful lines secured by enlarging the cowl and raising the radiator.

Slanting windshield and one-man top lend material aid in giving the entire car a lower, more stylish appearance.

An apron connecting the radiator with the fender skirts is also a decided improvement.

A comfort feature much appreciated by owners, is the additional leg room provided by the enlargement of the cowl.

Allow us to show you the entire line of new Ford cars now on display in our show room.

These cars can be obtained through the Ford Weekly Purchase Plan.

R. L. BREHMER

CARS · TRUCKS · TRACTORS

Fundamental Human Need.
It seems to me a great truth that human beings cannot stand on selfishness, mechanical utilities, economics and law courts; that if there be not a religious element in the relations of men, such relations are miserable and doomed to ruin.—Carlyle.

In the Same Class.
There isn't a whole lot of difference between the fellow who didn't know it was loaded and the theorist who never knows when his theory is going to explode.

Dancing for Growing Child.
An awkward and angular period of growth is passed through by quite a number of girls and boys. Sympathetic treatment should be accorded these young sufferers, and physical training given. In the latter dancing is admirable, its rhythm and harmony making their appeal. In dancing physical activity co-operates with the mental faculties, and under their combined influence the angularity and heaviness of the growing child disappear with the acquirement of perfect balance.

Pick Out a Beech Tree.
When in full foliage the beech tree is remarkable for its close shade and coolness. The branches and such parts of the tree as cannot be more usefully employed make capital firewood.

APPLES! APPLES!
Our large crop of well sprayed Winter Apples are now ready for market. We make a specialty of Orchard sales. Pay a visit to our orchards and select your winter's supply of apples. Two miles east of East Ringgold. Grandview Fruit Farm.

OPPOSITE COURT HOUSE
CIRCLEVILLE, OHIO

Smartly Cut Sweater Coat of Varied Colors

Showing a smartly cut sweater coat of varied colors. It is worn with a white plaited Canton skirt. The hat is of Japanese straw in blue.

Faille Ribbon Holds Lead for the Season

Wide printed satin and faille ribbons challenge grosgrain for its acknowledged leadership. Entire belting ribbon crowns or facings and crowns accompany timbo trims often enough. At least irregular brim edges of some otherwise regular blocked shapes are of necessity chic and those bound with ribbon—and not a stereotyped binding either—whipped over, or fluted edged ribbon run riot at present. Straw, hair and viscra woven ribbons are entering the style field, too—and will mean much ere summer's here. However, far more latitude is allowed in materials this year than in color, shape or trimming.

There are two sides to the choice of color—one the costume hat, the other the smart new hat established by the grande maisons. Color does not play solitaire in one smart shade, but answers "present" in many tones. Blended shades—capucine, purple, opal to Cleopatra effects standing out—but black and white are equal ends of the rainbow to choose from and are often allied.

In fact, black and white are spelling spring in engraved capitals. Cerise and navy form another combination that the French think well of always, but this year there are berry and navy, gray and navy or navy with almond green, perchance.

The utter absence of color makes an early appearance this season. White is winning its way beyond all dreams for this time of the year. It was tried out slightly in winter just before the silk hats came in, but it did not register a big hit. However, from the trend of things—fashionable at present white is to become a prominent factor—and a successful one.

Coats, Jackets, Frocks in the Fashion Picture

Top coats for spring show large plaids and checks in camel's hair, basket weaves, fleeces, tweeds and other soft materials.

The velvet coat is losing its tailored lines and severe effect and is being trimmed with a braid and with suffles of lace, which have a softening, flattering way.

Quilted silk is used to make smart little short jackets that are worn with straight, plain skirts. Sometimes heading, embroidery or braiding is used about the collar and cuffs. In Paris, these quilted garments are extensively shown.

Gorgeous evening wraps are made of shimmering gold or silver cloth, hanging very full from the shoulders and collared with white fox or white ermine.

Linsens for the coming summer are frequently embroidered heavily in self or in contrasting colors, or printed with Persian or Paisley designs.

A smart straight-line frock of yellow moire is worn over a slip of satin a trifle darker in tone, and girdled elaborately with pearls a trifle below the natural waistline.

Girls' Paris Frocks.
Straight from Paris are the most exquisite little frocks for the small daughter. They are made of the sheerest voile put together by hand and with effective contrasts of color. One of white has strawberries embroidered on the skirt. Another has narrow bands of rose color inserted with fagoting. A third of peach color is bound with blue.

Ermine Scarf.
At the opera recently was seen a gorgeous scarf of white ermine, edged with long white fringe. It was slightly smaller than the regulation Spanish shawl.

SOCIAL CALENDAR

Mr. and Mrs. J. W. Weaver, of Tilton, entertained to dinner Sunday. Covers were laid for Mr. and Mrs. M. S. Judy, Mrs. Rosette Turner and son, Emanuel, Thelma Carol and little daughter, Virginia May, of Laurelville Mr. and Mrs. R. L. Judy and daughter, Iva, of Pickerington, Mr. and Mrs. Frank Turner and daughter, Catherine of Circleville and Leon Butts, of Lancaster.

The marriage of Miss Miriam Smith, of Williamsport, daughter of Mr. and Mrs. John W. Smith to Mr. James Kendall Bryan, of Parkersburg West Virginia, was solemnized Saturday evening at 7:30 o'clock at the Williamsport Episcopal church. The ceremony was performed by Dr. John W. Hoffman, president of Ohio Wesleyan university assisted by Rev. R. L. Cross, of Williamsport. The church was very beautifully decorated with gladioli and southern smilax and before the bridal procession Mrs. W. B. Johnson sang "To a Water Lily" and "To a Wild Rose" and Mrs. John Dunlap sang "Oh, Promise Me" accompanied by Miss Helen Betts at the piano and Miss Alice Speece, of Parkersburg on the harp. The bride's little sister, Virginia, acted as ring bearer and Alice Tipton as flower girl. The matron of honor, Mrs. I. H. MacKinnon, of this city, the maid of honor, Miss Emmy Lou Carpenter, of Cleveland and the six bridesmaids, Misses Faye Blacker, of Cincinnati; Thelma Rickey, of Portsmouth; Virginia Warner, of Newark; Flora Booth of London; Helen Bennett of this city, and Mrs. Wallace McCoy, of Springfield, were attired in chiffon dresses which ranged from a very deep shade of lavender to a pale orchid. The bride was a perfect picture of youth and beauty in her wedding gown of white crepe roumaine, made with a bodice of crystal and pearl beaded design. Her tulle veil with a flared arrangement on one side, was held in place by a cornet of pearls and orange blossoms. She carried a shower bouquet of bride roses and swansonia, arranged with lilies of the valley, while her attendants carried bouquets of chrysanthemums. Immediately after the ceremony a reception was held at the home, of the bride's parents, after which the couple left for an extended honeymoon thru the south. They will be at home in Parkersburg, West Virginia. Both the bride and groom are graduates of Ohio Wesleyan university and both were very prominent in student activities he being president of Student Council and she president of Women's Student council, and secretary of her class. Mr. Bryan is a member of Phi Delta Theta fraternity.

Sunday at their home on East Main street Mr. and Mrs. Solomon D. Riegel celebrated the fiftieth anniversary of their marriage. Those present were their daughter, Mrs. Earl Swinehart and son, Mr. Darwin Swinehart, of Baltimore, Maryland; Mr. and Mrs. Howard Koch and daughter, Miss Mary, of Columbus; Mr. and Mrs. Fred C. Clark and daughter, Dorothy, and Mr. and Mrs. Harry R. Riegel, of this city.

Misses Harriet and Mary Marfield gave a breakfast party to the house guests of Miss Annette Groce, who are here to attend the Will-Groce wedding.

On Wednesday evening, October 10, the congregation of St. Andrew's Mission, Washington C. H., are giving a reception for Rev. and Mrs. R. L. Baird, of this city. Rev. Baird has St. Andrew's under his charge and holds services there each Sunday evening. To this reception all friends here are cordially invited. If you are planning to go over please notify Mr. Baird so he may in turn notify Washington how many to expect. The time is 7:30.

A good farm consisting of 104 acre tract with 8 room frame dwelling, 3 good barns, 2 room pupm station, scales, silo, cement corn crib, large cattle barn and windpump, well drained and fenced with 12 acres of growing alfalfa, located on paved pike just out of the corporation with lowest tax rate in the county. Within 100 yards of traction station, good market and school. If sold in a few days possession can be given at once. We regard this a fine location for a home.

The Cause.

Every reporter knows that the flatness of his story is due to his falling down on it.—Boston Transcript.

BADLY BRUISED

Henry Davis Thrown From Truck While Stringing Wires.

Henry Davis, employed as lineman by the Ohio Utilities company, was injured this morning while stretching wires for illumination of Main and Court streets.

Mr. Davis was standing on top of the truck in front of the Memorial hall with a wire in his hands when an auto truck going east came along and got tangled up in the wire and pulled Mr. Davis off. In the fall his arms, legs and nose were badly bruised and skinned and his back wrenched. He was taken home in the Ohio Utilities truck. Dr. H. D. Jackson is attending to his injuries.

Forging Stirrups.

The automobile has done much to destroy some of the industries connected with riding and driving. The forging by hand of hard steel stirrups, which used to be a flourishing industry, is nearly dead. It was work which required great skill, a trade which took a lifetime to learn properly. It is probable that very few men can be found today who are capable of forging a first-class stirrup out of a rough bar of steel.

GOOD ADVICE.

All that Circleville needs to start an industrial revival is for its citizens to forget self and join hands in a whole hearted movement in bolstering up industry.

If each person will forget petty personal jealousy, stop knocking and begin to boost in an effective manner the city can easily double its population in five years at the same time doubling the value of every foot of property in the city. Boost, don't knock.

James J. Hinde.

Our want ads bring results.

AMUSEMENTS

How many elements of characterization are necessary to a successful motion picture? In William de Mille's Paramount production of "Grumpy," which comes to the Met theater next Monday every essential is made use of. The cast carries on the story in a most pleasing fashion.

"Grumpy" for example, played by Theodore Roberts, one of the featured players, is a lovable, peculiar old character whose keen brain and quick wit saves every situation and who approves heartily of

Conrad Nagel, who enacts the role of Ernest Heron, a featured part, a clean-cut, pleasing young man who is entrusted with the \$500,000 diamond. Ernest is in love with

May McAvoy (featured with Roberts and Nagel in her role of Virginia Bullivant, daughter of "Grumpy") May is sweet and winsome at the age when romance rules her woman's heart. She is, therefore, divided between Ernest and

Jarvis (played by Casson Ferguson) who is at heart a villain and seeks to marry Virginia for her money. Jarvis attempts to get the diamond, in fact, does get it and tries to sell it.

Wolfe, one of England's worst fence for buying stolen jewels (played by Charles French. But Wolfe stays off.

Other characters in the story who lend to the mystery, to the comedy, the romance, thrills and the general plot are Susan the maid played by Bernice Frank and the parts of Keble Duddock and Dawson, played respectively by Bertram Johns, Charles Ogle and Robert Bolder.

APPAREL FOR WOMEN

LONG ILLNESS

Mrs. Clarence Cutright Succumbs to Cancer—Burial at Chillicothe.

Mrs. Alice Cutright, daughter of George and Elizabeth Kinnamon Overly was born in Ross county May 30, 1879, and died at her home near Harveysburg, September 28, 1923, after an illness of four years of cancer.

She was united in marriage to Clarence Cutright December 2, 1903 and to this union were born, Paul and Nellie, both of whom survive. Her husband preceded her to the grave.

Besides her children she leaves to mourn her loss two sisters, Mrs. Emma Bower and Mrs. Annie Knab, both of Chillicothe; also three brothers, Thomas Overly, Williamsport; George Overly, Columbus, and Lewis Overly, Chillicothe. She was converted when quite young and joined the Mt. Carmel Methodist Episcopal church 11 years ago.

Short services were held at her home at one o'clock Sunday by Rev. Mr. Bennett of Harveysburg. The body was taken to the home of Mrs. Emma Bower and funeral services were held Monday morning at 10 o'clock. Rev. R. A. Smith officiating. Interment in Greenlawn cemetery, Chillicothe.

HARRY RUCKMAN

Died of Dropsy—Funeral Services and Burial Thursday.

Harry Ruckman died at the home of his sister, Mrs. Isaac Fowler, of North Scioto street, Monday evening at 11:15 o'clock. The deceased had been ill five weeks of dropsy.

He was born in Champaign county, Illinois, February 27, 1872, and was the son of Wilson and Anna Newport Ruckman. He married Miss Laura Metzger, who survives. Mr. Ruckman was a member of the United Brethren church.

He is survived by a stepdaughter, Mrs. Frances England, his father, one sister, Mrs. Isaac Fowler and two brothers, Willard Ruckman, of Columbus and Fred Ruckman, of Toledo. The funeral services will be held Thursday afternoon at 2 o'clock at the home of his sister, Mrs. Fowler. Rev. Hiles will officiate. Interment in Forest cemetery.

PERSONALS

Mrs. Joe Wolfe spent the day in Columbus.

Mrs. L. E. Krafthefer went to Lancaster today to visit friends.

Mrs. Charles Gullett, of Athens, is the guest of Mrs. Charles Naumann.

T. G. Wallace, of Williamsport, was a business visitor in Columbus today.

Mrs. Artie Lucas went to Piqua today to visit her son, C. Herbert Lucas, and family.

Mrs. J. S. Smith and daughters, Misses Louise and Elizabeth, spent the day in Columbus.

Myrl Smith, who is attending Washington college, spent the week-end with his parents, Mr. and Mrs. J. E. Smith.

Miss Rose Christy, Miss Mary Smith and Mr. Boyd Smith spent the weekend in Gallon visiting Miss Helen Christy, a commercial teacher of the Gallon high school.

Orrin L. Gessley left today for Washington D. C., to attend the meeting of the National Association of Postmasters that will be in session October 10, 11 and 12.

Mr. and Mrs. George P. Hunsticker and his daughter, Mrs. Walter Duveneck, of Williamsport, went to Columbus today to be present at the meeting of the Knights-Templar state convocation.

Misses Mary Pope, of Detroit, Michigan; Elizabeth Allen, of Burlington, Vermont; and Susan Brown, of Yonkers, New York, arrived this morning to attend the Will-Groce wedding this evening.

Miss Lucile and Pauline Denman have returned from Marion, Ohio, to make their home with their grandmother, Mrs. Alice Strawser, of 526 East Union street. Alice Denman, who is in the second year of high school will make her home with her aunt and uncle, Mr. and Mrs. A. H. Morris, of Columbus, who will send her thru school.

Many Languages in Philippines. Such a variety of races are represented among the inhabitants of the Philippines that they speak a total of more than thirty languages.

One hundred and eighty local people have subscribed to the Hindu Box company \$25,200. Subscriptions now and help get this fine institution started.

Many Languages in Philippines.

Numerous languages or dialects are spoken in the Philippines, but with one or two exceptions they are transformations of the Malay tongue. Difficulties of communication between tribes has caused this differentiation of speech. In some instances two or three distinct dialects are spoken in a single tribe. Spanish was the official and commercial language before the coming of the Americans to the islands, and was spoken among the upper classes. Even today some of the Filipinos know only Spanish. English is, however, coming into wider use, and is taught in the schools as a part of the regular curriculum. As yet, though, it can in no way be said to be the universal language of the islands. Tagalog, Vlasya and Ilocano are the native tongues most widely spoken. They sound like gibberish to the English ear.

Wise Men of the East.

In ancient times there were "wise men" in Persia and Media, who knew, or were reputed to know a lot of things the common people didn't know. They studied the skies, the stars, the storms and the hold books and told the people what they thought they ought to know. These wise men were called magi—hence the word "magic," says the Detroit News. A myth is a fable, an allegory, a fictitious story, contrived to carry some sort of a moral or lesson. Some authorities class parables along with myths and allege that parables, allegory and myth are the result of conscious invention originally designed by some one who probably knew better, to deceive or mislead some one who didn't know better.

Art a Translation.

"I do not know," says Audrey to Touchstone, "what 'poetical' is. Is it honest in deed and word? Is it a true thing?" "No, truly," says Touchstone, "for the truest poetry is the most feigning." Out of the mouth of fools comes forth wisdom (when the voice is the voice of Shakespeare), but poetry in quest of fact has sometimes evinced a kinship with the bewildered intellect of Audrey. I am dwelling persistently upon illusion, because the fundamental conventions of poetry grow inevitably out of the fact that art is what it is, a translation, not a transcript.—John Loves, in "Convention and Revolt in Poetry."

Indians as Beasts of Burden.

Because labor is so cheap, Indians in Bolivia, South America, are beasts of burden, trudging along with huge loads at less cost than motor trucks. There are few cars even in the capital, where tiny burros and queer-looking llamas with packs pass up and down the streets, guided by natives, also heavily laden. In this city, founded almost 400 years ago by Spaniards, labor-saving ideas are almost unknown. In digging for a store in the capital, recently, Indian men and women carried away all the dirt in small baskets on their backs.—Popular Mechanics.

Hottest Country.

The sultan of Muscat rules what is probably the hottest country on earth. A Fifteenth century traveler wrote of Muscat, "The heat was so intense that it burned the marrow in the bones, the sword in its scabbard melted like wax, and the gems that adorned the handle of my dagger were reduced to coal." Possibly a little exaggerated. Still, the thermometer has registered 129 degrees in the sun in Muscat and 107 degrees even at night, so the visitors are grateful for those grapes that Muscat christens by the sweat of its brow.—Pittsburgh Post.

Bible in Translation.

The Bible is far in advance of any other book in the number of its translations, for it has actually been rendered in whole or in part into 770 languages and dialects and the end is not yet in sight. The translation is still progressing at the rate of one complete book of the Bible in a new language every six weeks, a speed record which has been maintained for over twenty years.—The Mentor.

Making of Art.

The making of art is a process of boiling down a great deal of life into the essence of art—a process of condensation. The appreciation of art is a process of living oneself out into its multitudinous, separate manifestations—a process of expansion. For the artist, life is for the sake of art; for the appreciator, art is for the sake of life.—Virgil Barker, in The Arts.

A Cosmopolitan.

Joe—Bill, what's a cosmopolitan? Bill—Well, suppose you was a Russian Jew livin' in America, and married to a Chinese woman, and you had just finished an Irish stew and you was smokin' a Turkish cigarette, while a nigger band outside was playing "The Blue Bells of Scotland," then you'd be a cosmopolitan.

Scots Made Pistols.

Before the advent of the American revolver, the Scottish cities of Perth, Stirling and Dundee were great centers of the pistol-making industry. Scottish pistols were famous as far back as 1515, and were exported to many countries. There were at one time nearly 100 concerns in Scotland engaged in the industry.

Sholes' Prediction.

Christopher L. Sholes, inventor of the first typewriter to be commercially successful, is said to have predicted that his invention would prove one of the greatest factors in the emancipation of women, by enabling them more easily to earn a living.

WHAT AND WHY OF AN EARTHQUAKE

Caused by Earth Waves Originating in Inner Regions.

TWO PRINCIPAL WAVE TYPES

Exactly what is an earthquake and what causes it?

These two questions very naturally pop into the minds of millions of persons when a catastrophe such as that which recently occurred in Japan overtakes some great city and causes thousands of deaths.

A bulletin from the Washington, D. C., headquarters of the National Geographic society answers these questions:

"Superficially the name itself tells the story. It is no more nor less than a quaking of the earth or a part of it; and theoretically any vibration at all fills the bill, from the tremor caused by a heavy truck passing along the street or a blast in a nearby quarry to the most violent convulsion that slides hills from their bases and opens yawning chasms in the earth.

Earth Waves Hold Secret.

"But going beyond the superficial, there is more that needs to be said even by way of a bare definition of an earthquake. The quake in so far as man experiences it is the coming to the surface of waves in the earth. These waves cannot be compared simply to the up-and-down waves of rippled water nor to the back-and-forth waves in the air that make sound. Even the simplest wave motion is none too easy to understand; and the waves in the varying earth materials that make themselves known to man as earthquakes are probably the most complex waves that exist. They are at once motions 'up-and-down' like sea waves; crosswise like the waves in a flapping flag; back-and-forth like sound waves or the motion in a long coiled spring suspended with a weight bobbing at its end, and in addition may have twists about imaginary pivot lines in all of the three dimensions.

"The earth waves originate in some region down in the earth and start out in every direction. The waves from a pebble dropped into a pond form growing circles on the surface of the water. But the waves in the earth being in a solid, attempt to form spheres that constantly grow outward. Soon, however, because of the difference in the rigidity of different rock materials, the form is not a sphere at all but a very irregular curved solid instead, more nearly that of a potato, perhaps.

Two Kinds of Waves.

"The two principal types of earth waves, those that travel like the pulsations in a bobbing spring, straight out; and those that travel like ripples and the waves in a flag, with a sidewise motion, move at different speeds. The pulsing waves are the swifter, and of course the place where they make themselves felt first and most strongly is the surface area straight above their starting point. This is technically the 'epicenter' or 'epicentrum.' The pulsing waves around the epicenter alternately push up the surface of the earth and everything on it, and let them fall back. This is done very rapidly, and though the actual rise and fall may be only a fraction of an inch on rocky surfaces or a very few inches on soft soil, the violence may be like that from innumerable tremendous blows, and sufficient to shake down buildings.

"The 'sidewise' waves follow along almost immediately after the first pulsing waves, and the two, with perhaps 'twisting waves' as well, then operate together. The ground in the epicentral area, therefore, gets innumerable thrusts and falls and at the same time is jerked sidewise and back for tiny distances in every direction.

"At points some distance from the epicenter the pulsing waves strike the surface at a slant and so accentuate the effects of the 'sidewise' waves and create new surface undulations. The shaking at the epicenter, too, throws the earth's surface there into undulatory waves like ripples on a pond, and these also travel outward in widening circles. These surface waves are those of greatest motion but least speed. They register the heaviest vibrations on the seismographs of the world.

How the Waves Start.

"The second important question in regard to an earthquake is: What starts the waves?

"No one has ever seen an earthquake wave start outward from its center, and it is safe enough to say that no one ever will. But science has built certain hypotheses about the matter that seem to account satisfactorily for the happenings, and which are accepted pretty generally.

"Hold a dry stick as big as your thumb in your hands and bend it until it breaks. At the snap waves will travel to your hands and usually give you a quite painful sensation.

"Hold an iron bar by one end and strike the other sharply with a hammer. Again the vibrations carried to your hand may be violent enough to produce a stinging pain.

"And if you should strike a small explosive cap with the end of a long rod grasped by the other end, the explosion would probably bring the same painful tingle to your fingers.

Breaks Probably Most Important.

"It is generally believed that earthquake waves flow from a point where one of the three forces illustrated is suddenly released—a break, a blow or an explosion. Breaks are credited

with the responsibility for most earthquakes. It is believed that because of slow contraction or shrinking which may result from the cooling of the outer portion of the earth or because of pressure from deposited silt, strains are set up below the surface like those in the bending stick. Eventually the strain reaches the breaking point and there is a snapping of the rocks which sends violent waves to the surface, causing earthquakes.

"The blow type of earthquake is probably less important. Such a blow might result from the falling in of a great cavern, but probably would cause only a local shiver. A more important cause of a blow might be a slipping of one mass of rock over another with a collision at the end of the slide. Such a blow often follows a break, the two acting together.

Volcanic Explosions Play Part. "Earthquakes in active volcanic regions may often result from explosions of gases far beneath the surface; but it is quite possible that even in the neighborhood of volcanoes the majority of the quakes may arise from sudden breaks in the rocks.

"That the earth's 'crust' is subjected to squeezing and pinching is evident from mountain ranges, which are the portion of the crust that is 'pinched up' as one can pinch up a ridge of skin on his arm. If mountains were ever thrust up at all rapidly the earthquakes at the time must have been terrible. Even now there are certain mountains that, though millions of years old, are still geologically 'young' and are slowly rising. The mountains of Japan fall into this class, and it is their 'growing pains,' so to speak, that cause the almost daily earthquakes in the Japanese archipelago. Now and then the strains accumulate over a considerable period and the break or slide and collision which finally occurs is violent enough to shake down hills, open wide cracks and destroy cities."

IS CHIEF OF BUREAU OF HOME ECONOMICS

Dr. Louise Stanley, recently chosen by Secretary Wallace as chief of the bureau of home economics of the Department of Agriculture, is shown here at her desk shortly after she arrived in Washington to assume her duties. At the time of her appointment she held the position of dean of home economics at the University of Missouri. Doctor Stanley is a native of Nashville, Tenn.

HELD FOR "GAS" CON GAME

German Police Arrest Man Who Victimizes Factory Owner.

Not as old as the "lost pocketbook" trick, but just as effective in separating the unwary from their wealth is the "artificial gasoline" game, according to the German police of Berlin who have arrested Leopold Vitz, alias Baron von Orloff.

Orloff, the police declare, victimized the manager of a Friedrichshafen factory to the tune of millions of marks with his tale of how he could make gasoline out of water. The water "treated" by Orloff, who overcame his dupe with trick photographs showing him in the company of the ex-kaiser, remained water. The marks were converted into wine and a general good time.

FINDS \$1,000 IN "BOOK"

Secondhand Man in London Returns Treasure Trove to Owner.

The widow of the late John Troutbeck, for many years coroner for Westminster, England, had such a surprise when a box, shaped like a book, containing £200 (\$1,000), was returned to her that she fainted. It appears the "book" was among a number which Mrs. Troutbeck sold for £3 (\$15), thinking they were old medical works of her late husband's and of little value. The bookseller on examining them discovered one had a lock and on opening it found a £5 note and 190 £1 notes, which he returned to the widow.

To Dig Out Spanish Tax Dodgers.

The Spanish government is to resort to airplanes in its search for tax dodgers. An aerial survey of the country, in which pictures will be taken, is planned to learn the exact area of all the property held by each landholder.

Fired Into Group of Loafers.

Because he was unable to sleep while a half dozen men loafed in front of his flat in New York city, Joseph Borgabona fired at the group. James Hennessy, thirty-one years old, who lived nearby, was fatally wounded.

Hotel Stenographer

BY ROE FULKERSON

"Did you tell that guy he was handsome?" asked the House Detective, grinning. "He's as homely as a mud fence."

"That's the answer," said the Hotel Stenographer. "All men want to be what they are not."

"It is wasted effort to tell a handsome man he is good looking. I always tell a good looking guy that he is brainy and a homely cuss that he is good looking. Both are sure to agree with you. So many people notice that good looking men are good looking and homely men are brainy, that they think you are smart because you have noticed something the others haven't."

"I make it a rule to pat a bald headed man on the bean and tell him he is intellectual. All bald men think every one is dodging them because they are bald and if you pretend to like, they think you are worth while. "I always tell old men they are wicked kids, and make 'em happy and it does not hurt me any."

"I always tell a young man I think he is dangerous. Nothing pleases him so much as have you think he is a blase man of the world."

"I always tell a little runt that I could cling to him with confidence, and tell a fat man that I love to dance with him. A fat man knows nobody likes to dance with him, just as the little guy knows that women like the big strong kind of men."

"I do not know why, Kelly, but wicked men like to be thought good, and harmless ones like to be thought wicked. They like to be thought the things they are not, so I give 'em the once over and pretend I think they are what I know they are not. It makes them happy and I am a regular good Samaritan, because if you make your customers happy, they are certainly liberal with their tips."

Portugal's National Epic.

The national epic of Portugal is the "Lusad," written by Luis Vaz de Camoens (1524-1580) and published in 1572, says the Detroit News. The great poem which has been translated into many languages, was begun by Camoens while he was in exile in India and was completed shortly after he was allowed to return to Portugal. Before 1700, 38 editions of the "Lusad" were printed in Lisbon. Although the "Lusad" was, as a piece of literature, a tremendous success, it netted its author little financial gain, for, as his epitaph, destroyed in 1775, read, "He lived poor and neglected and so died."

PUMPKIN SHOW REST ROOM

Ladies' and Children are especially invited to use the comfort station and rest room to be maintained during the Pumpkin Show at our place of business. Tables and chairs will be provided and packages will be checked for you free of charge. Clean toilet waiting room in which you can spruce up the children and a nice warm waiting room in which to meet your friends. Our place of business and our employees will be at the service of the public during the Pumpkin Show period.

GEO. W. LITTLETON.

THE GIRL WHO HID

By AGNES BROGAN

(© 1923, Western Newspaper Union.)

JOHN CRAVEN looked at the white, almost tragic faces of the two he loved best and passed a hand wearily over his brow. In a busy life he had met with so much disillusionment that he had hoped, earnestly, here in his own home he might not be disappointed. But disappointment had come, and most humblingly.

That it should be Elaine's little protégé who more than disappointed was a bitter fact. And he, too—how he had counted on the girl! How he had, unconsciously, trusted and loved her. Yes, loved—he admitted this now, in a calm, detached sort of way.

"Fritzie"—the odd little name that seemed part of her endearment—"Fritzie," who had been the song and sunshine of the great, gloomy house from the day that his sister Elaine brought her, so triumphantly, from the mission house in the lower part of the city, where Elaine was interested in social welfare work.

"Fritzie" had not been an occupant of the mission house; she lived near it, Elaine explained, in a shabby old tenement building. But she had taken advantage of certain classes at the mission, and had helped Elaine with her work, too, among the people. When the girl's father died, leaving her alone in the corner room of the tenement, Elaine, in her own sisterless condition, had asked the mission girl to come out to the big house and call herself Elaine's secretary.

And so far "Fritzie" more than repaid. And she, as well as Elaine, had appeared happy in the situation.

"These slum girls are not proper or responsible persons to bring into one's home," Aunt Polly had insisted.

Rollin Danvers moved uncomfortably in his chair. Rollin and his belongings were always causing trouble or confusion, John thought, unreasonably. And this trouble was because of the girl Rollin's diamond ring. It had been given to Elaine as an engagement ring, and when Rollin's affections went flitting—to rest at Hester's door—Elaine had given back the big diamond, leaving her finger in noticeable bareness.

Hester, his sister's guest as well as her rival, wore no ring on her pretty finger; that probably was to come. The tragedy of today lay in the fact that the valuable diamond which Elaine had returned had for several days been missing from its corner in the dressing table assigned to Rollin's use during his stay in the Craven home during the house party which had developed such unfortunate happenings.

After fruitless search and inquiry "Fritzie," the adopted inmate of the very home circle, was proven—and admitted—the thief.

Carrie, the housemaid, had with her own eyes seen "Fritzie" secreting the ring. Still, sadly, John Craven gave the girl one last chance to clear the imputation.

"You need have no fear of punishment, 'Fritzie,'" he said. "Rollin assures us that all he wishes is his property. And you have returned the ring. The matter will be kept among ourselves. Therefore, you may have had some excuse for having the thing in your possession—some explainable reason. You took it because—?" Pleadingly, his eyes begged the girl to answer his question.

Elaine raised her head to look up into the calm face above her own. "I took it," "Fritzie" answered, after a moment's hesitation—that was all.

During the days which followed, the happy little creature who had come among them so joyously—and had departed so silently—was not to be found. John Craven did try to find her; an aching fear haunted him that in that family denunciation in the library wrong had been done, despite the girl's own confession.

But well was "Fritzie" hidden. Her true name—Elaine helped him—was plain "Mary Hunter"; the other, adopted by the admiring folk of the tenement, had been her father's pet whimsical name for his loved little daughter. Then, when "Fritzie" had been hidden for a year, Elaine, in her new-found happiness of the renewal of her engagement to the carefree Rollin, came one day to her brother to make tearful confession.

"You see, I was so afraid that Rollin intended to give my ring to Hester—though now he tells me he was only trying to make me jealous—that I sent 'Fritzie' to his room to get it. When Carrie saw her, 'Fritzie' was placing it in her own small safety box. She had no idea that she was doing wrong. But I meant to straighten things later—then 'Fritzie' ran away to shield me from humiliation. I do believe. She had an undue sense of gratitude."

Accidentally—or it may have been fate leading—John Craven found himself one day before an old tenement building near the settlement mission. On an unaccustomed shining window he read a name—"Mary Hunter, Medicine Shop."

Yes, it was "Fritzie" who greeted him gravely across the white counter.

"My father," she explained, "was doctor to these people all his life—a life purposely devoted to their needs. Before he died it was his wish that I carry on the medicine part of the service, at least. I had but one more year to study when Elaine came and took me to your home. Since then I have finished my year. So I am back with the people who need and trust me."

"I need you, 'Fritzie,'" John Craven humbly pleaded. "I need and trust you as a man needs and trusts the woman who must be his wife."

And so he persuaded her.

Interesting Reflections.

Franklin came of a line of sturdy blacksmiths who lived for two hundred years in England only twelve miles from the manor house of Washington's ancestors. It is interesting to reflect, in the light of subsequent history, how the pink-coated huntsmen of Washington's aristocratic family may have had their horses shod by Franklin's kinsmen.

AUTO LAUNDRY

Turney's Auto Laundry is at 212 West Main street. Call phone 34, Colonial garage. All calls promptly attended to and work satisfactory.

FRANK DENNIS FARM FOR SALE.

177½ acre tract, 6 room frame dwelling, good frame barn with metal roof, two good corn cribs and other outbuildings, well tilled and fenced with four good wells; located two miles west of Five Points on a good pike in Monroe township.

This is an ideal stock farm or it would make a nice country home. We are offering this at \$125 per acre for the next thirty days.

CIRCLEVILLE,

OHIO.

Out for Business.
Hanging on a strap in a crowded street car to the music of the conductor's sonorous voice at frequent intervals bellowing, "Step forward in the car, please," a negro remarked, "Dat boy sho' mus' be workin' on comishun."—Columbus Dispatch.

Nicknaming the Great.
Robert Burns was known as "Rantin', Rovin' Roblin"; Shakespeare as "Gentle Willie"; Doctor Johnson as "Sulky Sam," and the "Great Cham of Literature."

EMPLOYMENT FOR MANY.
Every person in Circleville realizes how badly the city is handicapped by the lack of permanent all-year-around industry.

The Hinde Paper Box company if started here will employ 140 people at the start and more in the near future, paying liberal wages.

Subscribe now and boost this excellent project along.

Friends of Job.
"Job's comforter" is the expression ironically used to denote any person who, under pretense of sympathizing with another's afflictions, attributes them to his misdeeds and thus aggravates his sorrow. The allusion is to Eliphaz, Bildad and Zophar, friends of Job, who visited him in his distress and declared that his misfortunes resulted from his sins and iniquities. "Then Job answered and said, I have heard many such things; miserable comforters are ye all."—Job 16:1-2.

"Keep Your Powder Dry."
The saying, "Keep your powder dry," is attributed to several historic persons. It was probably first used by Oliver Cromwell, says the Detroit News. On one occasion, the story goes, when his "Ironsides" were about to attack the enemy on the opposite side of a river, Cromwell concluded his address to them: "Put your trust in God; but mind to keep your powder dry." Since that time several great soldiers, including Napoleon, have used the words.

Black Knot Most Serious Disease

Must Be Carefully Watched and Controlled by Spraying.

There is a disease of plum trees that bears the very descriptive name of black knot. It is observed on the twigs of plum trees, and sometimes, on cherries, where it causes a knot like a swelling that is olive green in color in spring and black in the fall. Where the disease appears on limbs, the swelling may extend up and down the branch for as much as a foot, while on fruiting spurs it may exist as a knot no larger than a grain of wheat.

Caused by Fungus.
Black knot is caused by a fungus that affects the wood, causing it to swell into the rough, deformed places. It is regarded as a serious, destructive disease, and one that must be carefully watched and kept under control. Damson plums are more subject to black knot, and varieties of the triflora group the least liable to suffer. Spores of the fungus are liberated in spring from the galls formed the year before. When infection takes place the knots may be observed in the fall, but they are more conspicuous in the spring. With the beginning of growth in spring the knot swells rapidly and bursts the bark, which at that time may uncover a yellowish surface which rather quickly turns to a velvety dark green color. The knot then is covered with a mass of summer spores, which are carried by the wind to spread the disease. Toward fall the knot turns black and develops a new crop of spores that are not liberated until the following spring. These are called winter spores and differ very much in their origin from the summer spores.

Most Satisfactory Control.
While spraying may be a safeguard against infection, the most satisfactory control of black knot is to prune off and immediately burn the infected twigs and limbs. When this is done in the fall or winter, the source of infection is removed. In doing this pruning, it must be remembered that the tiny, little knots so easy to overlook on the fruit spurs, are capable of keeping up the infection. Watch for the little knots on the twigs, and cut them out. Burn all of the prunings at once, otherwise they will liberate spores just the same as if they had not been cut off.

Important That Horses Receive Liberal Ration

During the working season when horses are performing heavy work, it is very important that they receive a liberal ration of grain and roughage. Opinions differ greatly regarding the amount and kind of feed a horse should receive when performing hard work. Corn and oats, mixed, make a very acceptable grain feed. A good combination of these two feeds is two bushels of oats to one bushel of corn. A general rule that will give good results is to feed about 1 1/4 pounds of grain to every 100 pounds of horse at hard work. One gallon of grain mixture three times a day is about the proper amount for a 1,200-pound horse. Approximately one pound of good quality hay per day per one hundred pounds of live weight is sufficient. The amount of hay to be fed will necessarily vary somewhat with the kind and quality available. Where horses are turned on a night pasture, they should have access to hay at least during the noon hour. Plenty of water is very essential to good success with work horses. They should have access to clean water in the morning, at noon and during the night.

Select Breeding Males as Soon as Practicable

The selection of breeding males for next season should begin as soon as they can be distinguished from the pullets. The Missouri experiment station bred up a great flock of layers in a few years simply by selecting the cockerels that showed first and the pullets that laid first for breeding purposes. If one does not trap-nest it is difficult to select the pullets from large flocks. But a few minutes spent with the cockerels early on a clear morning will readily distinguish the more advanced males. A peeping red comb is the first indication; and a squeaky crow is the second.

The exceptional cockerels of the Leghorns and other lighter breeds will start to crow at about six weeks. The heavier breeds usually take from eight to nine weeks. These early crows should be marked by wing bands or leg bands and given special attention until maturity.

A few minutes spent in observing the males at this age will repay the breeder many times over for his trouble.

Dampness or Draughts in Hen House Cause Roup

Dampness or draughts in the poultry house cause roup. Isolate the sick birds. Remove as much of the accumulations in the nostrils as possible. Rub the head of the sick hen with camphorated grease. A coal tar disinfectant is useful in treating, and especially preventing roup. The success with most roup cures depends on treating the bird with a cold and curing the cold before the devitalized condition of the hen makes a cure impossible.

Qualities That Make for Success.
The successful man is the one who has tried not cried, worked not dodged, shouldered responsibility not evaded it, who has gotten under the burden, not stood off looking on and giving gratuitous advice.

NOW IS TIME TO HELP.
Now that the Hinde Paper Box company has selected the site for their new Container Plant, there is no longer any reason for our people withholding their support from the project. Fibre containers are used here in very large quantities. The city is badly in need of steady employment for its people. Let everyone subscribe as they can afford and help get the good work started.

NOTICE.
There will be a special meeting of the W. H. M. S. in the Methodist church parlor Monday evening at 7 o'clock. All members are urgently requested to be present as a very important matter is to be decided at this meeting. 6octd2.

The Fibre Container industry in Circleville is a logical kind of business to engage in the paper business. It has proven profitable in the Miami Valley at Piqua, Tippecanoe City, Dayton, Franklin, Middletown, Lockland, and Hamilton and Cincinnati where ten thousand people are engaged in it.

DO NOT BE DISCOURAGED.
If others have failed to repair your broken castings. Remember that the Circleville Welding Co., established over four years ago specializes in welding. If your valve goes thru your Fordston tractor head it can be made as good as new at a saving of \$7. Other work in proportion. Our motto—REAL WELDING at reasonable price. CIRCLEVILLE WELDING CO. Rear 309 East Mill St., Telephone 231. 24septd10w4. Circleville, Ohio.

COAL—WINTER—COAL
We handle the best grades of Virginia White Ash, Hocking and Poca-hontas lump coals. Phone 714. N. T. WELDON, West Main St. 17septd&wtf.

BUILDING LOT FOR SALE.
Vacant lot 50x160 feet located on North Court street belonging to C. F. Reichelderfer is offered at a very low price, if sold at once. Circle Realty Co. Phone 234.

THE WONDER OF THE AGE THE HOT BLAST AIR TIGHT FLORENCE

NO SMOKE! NO SOOT! NO DIRT! NO CLINKERS! EVERYTHING IS CONSUMED.

At the end of the season's use with soft coal, there will be no soot in the pipe or flue

The Zenith of Stove Perfection

The only jointless leg bottom and base with full radiation and large ash pan that is on the market or has ever been made in the history of the stove industry.

The jointless leg bottom and base makes the stove air-tight below the grate, which is the only true fire keeping principle.

It will be as good a fire keeper twenty years hence as it is today.

The Hot Blast Air-Tight Florence will heat twice the space that can be heated by any other stove on earth at one-half the cost.

The only perfect floor heater that is or has ever been made.

All features are patented and no stove manufacturer, dealer or user can copy or use same until the expiration of the patent without incurring liability for an action for damages.

THE HOT BLAST AIR-TIGHT FLORENCE burns soft coal or slack and all the smoke and gases. No filling up of the stove, pipe or flue with soot. No dirt inside or outside the house. It will burn hard coal and all the gases which escape from the hard coal base burner. It will burn wood and sawdust, wet or dry. It will produce one-half less ashes than any other stove on earth with any kind of fuel and leave no clinkers or half consumed fuel.

TED SAWYER

Plays on Ohio University Football
Team—Meet St. Xavier Next Week.

Ted Sawyer, of Circleville, has made the squad on the Ohio university football team and last Saturday made the trip to Oberlin college where Ohio was very unfortunate to lose six to nothing. Sawyer plays an end position and is giving both lettermen on the flanks a fast run to hold their positions.

Ohio started her season with 14 letter men but due to the lack of quarterback has been rather slow in getting started. The coaches here have remedied the situation and the Green and White from now on will be an eleven to be feared by every team it is to meet during the remainder of the season. Ohio plays St. Xavier, of Cincinnati, at the Queen City this week.

AUTHOR HONORED BY NATIVES

Samoans Ordered Not to Fire Gun
Within Earshot of Robert Louis
Stevenson's Grave.

James Chalmers, English Papuan missionary, who was killed and eaten by cannibals at Goaribari, met Robert Louis Stevenson on a Pacific steamboat when the novelist was fleeing to Samoa to escape death from tuberculosis. After meeting Chalmers, Stevenson was always an out-and-out defender of foreign missions. "Perhaps that masterpiece of philippics that Stevenson wrote to smash the traducers of Father Damien was inspired by his chance meeting with James Chalmers," writes Arthur Porritt, in "The Best I Remember."

All the time he was in Samoa Stevenson was the friend of the missionaries, and he took their view as to the proper treatment of the natives.

Now that he is dead the Samoan natives respect Stevenson's memory by a beautiful regulation. "By order of the chiefs no native must discharge a gun within earshot of Vaillima," says Mr. Porritt, "lest the birds that sing around poor R. L. S.'s lonely grave might be frightened and suspend their requiem."—Detroit News.

The Seven Sleepers.

Seven noble youths of Ephesus, who, according to an early Christian legend first related by Gregory of Tours, fled from the city, during a persecution under the Emperor Decius (249-251 A. D.), and took refuge in a cave on Mount Cellon. There they were discovered by their pursuers, who walled up the entrance in order to starve them to death; but, owing to a remarkable interposition in their behalf they were caused to fall into a deep sleep, and were thus miraculously preserved for nearly two hundred years. They died soon after awakening, and their bodies were transferred to Marseilles, France, in a stone sarcophagus, which is still shown to visitors to the church of St. Victor, in that city. According to Gregory, the names of the "seven sleepers" were Constantine, Dionysius, John, Maximian, Malchus, Martinian or Marclan, and Serapion. A festival in their honor is celebrated in the Roman Catholic church July 27. The legend of the "seven sleepers" is widely current in the East. It is of Syrian origin, and occurs in the Koran.

New Kind of Plow.

Despite the development of most farm machinery, the plow has changed little in more than 3,000 years. In primitive times plows were drawn by man power or oxen, today they are efficiently operated by tractor. But the actual shape of the plow and the method of turning the furrows in the soil is much the same as in primitive times.

A unique farming tool has been invented in France which attacks the problem in a new way. The plow is replaced by a number of metal fingers which dig deep into the earth, break it up and prepare it for planting, all in one operation. The labor of plowing and cultivating is thus done quickly and efficiently. The new device seems to work equally well in hard, dry or soft ground and promises an important saving of labor for the farmers, according to accounts.

Reason Why a Top Spins.

Every one who has ever whirled a string to which a stone is tied must have noticed the strong "pull" as the stone tried to get away. Every part of a spinning top is trying to fly away from the center. As each particle of the top has an equal pull, none of them can upset the balance of the others. So long as this force is strong enough—that is, so long as the spin lasts—it counteracts the ordinary power of gravity, which has to confine itself to the peg of the top, the only point actually touching the earth.

When the top slows down the centrifugal force relaxes, gravity comes into its own again—and the top falls over.—Scientific American.

Much in Little.

The brief style is that which expresses much in little.—Ben Jonson.

FISH CLIMB TREE

Anabas Scandens Have Thirst
for Palm Wine.

Certain Kind of Perch Performs Remarkable Feat—Has Lungs as Well as Gills.

Several hundred years ago some European travelers returning from a visit to India told a fish story rivaling some of the animal fables invented by Baron Munchausen. They affirmed that they had seen, or at least heard of, a fish which apparently feeling the need of a bit of stimulant now and then, emerges from the water near a convenient coconut tree and then climbs the latter to have a drink of palm wine.

The learned men of the day scoffed at the absurdity of this nature tale, but about the beginning of the Eighteenth century the story was repeated, with some modifications, to be sure, by a more reliable authority.

A certain Danish lieutenant, named Daldorf, made a formal report to the newly-founded Natural History Society of London, named in honor of the famous Swedish naturalist, Linnaeus, that he had really seen in the waters off the coast of the East Indian city of Tranquabar a fish which left the water at intervals and actually climbed the stem of a palm tree. It accomplished this remarkable feat by attaching itself to the trunk of the tree, by means of the ends of the extended gill covers and at the same time pressing the tall fins and anal fins against the bark, thus managing by suitable motion of its body to hang on and climb higher and higher.

The Danish sailor did not reveal where it was seen, but said when captured it showed no distress at being out of water and gamboled happily in the sand for hour after hour.

The assembled naturalists were unconvinced. They were quite sure that fish are able to breathe only by gills, and that when these are dry, as they soon must be when a fish is taken out of water, the fish inevitably quickly dies.

Strange as it may seem, however, the story was true. There is a climbing fish which can live out of water for quite a long time. This is the climbing perch, Anabas Scandens. To be sure it climbs only occasionally and then upon palm trunks, which ascend not vertically but at a convenient slant. It does make a practice, however, of climbing out of the water and spending hours in the dry grass on the bank. This fish has lungs as well as gills, which accounts for its unusual powers.—Review of Reviews.

Shrine Yields Heathen Relics.

Relics, estimated to be about 4,000 years old, have been found by artists in a tomb and shrine of heathen worship built during the Stone Age. Located in the southern part of Sweden, it lay buried beneath ten different strata of earth. Constructed of large rock slabs, it has a central chamber, ten by five feet. Around this is a circular pavement, from which radiate a number of curious walks marked by stones. A considerable quantity of human and animal ones, together with flint daggers and spearheads, were unearthed. Also, there were about 7,000 fragments of ornamented vases which had been thickly strewn outside the tomb. The shattering of these containers probably took place in connection with heathen religious ceremonies.—Popular Mechanics.

She Had Company.

Thompson was coming home from a dance, when all of a sudden he collided with some one who was running wildly in the opposite direction. When the two had sorted themselves out he saw that the other was his friend, Wilks.

"Why, Wilks!" he exclaimed. "Where are you going in all this hurry?"

"I—I am going for the police," replied his friend.

"For the police! What is the matter?"

"We've got burglars in our house."

"But surely you haven't left your wife alone?"

"Oh, no! She's holding the burglar!"

Last Words of "Bob" Ingersoll.

Robert G. Ingersoll, the agnostic, died suddenly and did not talk about religion and the after-life just before his death, as popularly supposed. On the day he died he suffered an attack of acute indigestion and lay down to rest. About an hour later he put on his shoes. Noticing that he looked pale, his wife offered to have his dinner brought to him. But he refused, saying, "Oh, no, I don't want to trouble you." Then Mrs. Ingersoll offered to give him some medicine, but again he refused with a smile, saying, "I'm better now." Those were his last words. He sank down in his chair, dead.—Detroit News.

Honesty in Shoes.

"No," said the old man sternly. "I will not do it. Never have I sold anything by false representations, and I will not begin now."

For a moment he was silent, and the clerk who stood before him could see that the better nature of his employer was fighting strongly for the right.

"No," said the old man again. "I will not do it. It is an inferior grade of shoe, and I will never pass it off as anything better. Mark it A Shoe 'It for a Queen, and put it in the window. A queen does not have to do such walking."

DERBY DUKES

Defeated by Robtown Baseball Team by
Score of 6 to 0.

The Robtown boys showed the Derby Dukes how to play real ball Sunday and defeated them 6 to 0. Only four of the Derby boys were able to get on base and two of them got out trying to steal second. It's no use trying to steal with Neff on second and Tharp doing the catching was what they said. Dewey pitched a real brand of ball and allowed but one hit and struckout thirteen. Robtown boys collected thirteen hits off Hunter, including three base hits, Neff 2 and Hill 1, and he only struckout two. Bobtown and Derby will play the third game of their series at Harrisburg next Sunday, both teams agreeing to play on neutral grounds.

FLINT PROPERTY SOLD

The Ida Flint property located on Ohio street was sold at sheriff's sale Monday to N. E. Clifton, consideration \$1,400. C. G. Chalfin was the auctioneer.

HOME FROM HOSPITAL

Mrs. G. H. Colvill, who has been undergoing treatment at Mt. Carmel hospital Columbus, for appendicitis, was brought home by her son, Robert G. Colvill, last Saturday.

Mrs. Frank Palm, who has been undergoing treatment at St. Anthony's hospital Columbus, has returned home. She was accompanied by her husband and Miss Tena Leist and Mr. and Mrs. Harvey Valentine.
